Video Streaming and Hosting Services

We Are Simplifying the Delivery of Video Content

McIntyre Streaming & Hosting Services offers an easy to use hosted streaming platform that takes the hassle (or headaches) out of managing local streaming servers. We have been providing hosted streaming to Colleges, Universities, School Boards and Districts, Health Agencies and Government institutions for many years.

Don't get tied up in aging and expensive infrastructure! Let us host your content for you.

Our streaming service offers you many different services to choose from. You can pick the basic hosting service that will allow you to stream content 24/7 and is mobile device friendly.

We currently host video content for over 1000 schools in Canada.

An easy-to-use, affordable and customizable hosted streaming platform.

No more hassles or headaches!

Features:

The basic service also includes the following features:

- Your institution logo at the top of the hosting page.
- Chapters (where available) with searchable descriptions
- Unique URLs per title which can be integrated into your catalogue for easy access.
- Metadata for cataloguing and the ability to export metadata by date range.
- Administration Portal to view usage stats.
- Embed Code to easily integrate content in a Learning Management System.

Welcome to McIntyre Media Inc.

OUR CANADA:

Grades 4-6 2016 CC 15-18 min each/7 programs McIntyre Media Inc.

Teachers across Canada have long asked for an up-to-date series on Canada's geographic regions. After much research and gathering of footage, we can now say we have put together an excellent new 7-part series for you and your students.

We have consulted Anne Smith Mansfield, Queen's University Geography curriculum instructor and winner of the Royal Canadian Geographical Society (RCGS) Geographic Literacy Award, gathered beautiful high-definition aerial and ground footage from some of Canada's leading film producers and drone operators, worked with Luke Murphy, a leading animator to provide you with accurate and colourful maps and graphics and our own in-house experts, Mary Cubello, University of Toronto Geography and Geomorphology graduate and Pauline Weber, Teacher-Librarian and Coordinator of Media and Libraries wrote and edited the scripts.

Produced for Canada's 150th Birthday, this visual masterpiece will take students on a visual journey across the country. Sweeping vistas, spectacular mountain ranges, majestic rivers, rolling plains, vibrant cities and towns capture the beauty of this wonderful country. Accurate, up-to-date content explores Canada's six physiographic regions. From the Cordillera to the Appalachians to the Arctic, students will get a broad understanding of the geography of each region, including geology, population and settlement patterns, industry, vegetation and wildlife, and an overview of original settlement by various First Nations groups.

Included is information on our continuing struggle to build a sustainable environment where students will learn to become responsible, active citizens.

The first program, *Our Canada: An Introduction* gives students a broad overview of Canada - our geography, population, settlement pattern, industry, resources, vegetation and climate. Each of the subsequent 6 programs offer an overview of one physiographic region. These programs provide viewers with a description of the qualities that make each region unique and explain how these features can be affected by human development, weather, and other factors. Viewers will be given an overview of the region's history, geology, climate, vegetation and animal life to better understand each area.

Undiscovered Vistas

Grades 6 - Post-Sec 2015/2016 46 min each CC Blue Ant Media Series BAM300

UNDISCOVERED VISTAS is an awe-inspiring journey that reveals some of the most beautiful places in the world. Spectacular aerial vistas of cavernous canyons and lush rainforests draw viewers into an immersive natural landscape, while lyrical writing tells the stories of the nature, history and mythology that shaped the planet's geographic wonders. The globe's unspoiled beauty is uncovered here.

SPECIAL SERIES PRICE - ONLY \$1386 (14 programs) - Series Product #BAM300 - a saving of \$280
Individual titles: \$119 each (DVD or streaming)

Gros Morne National Park

Stretching across western Newfoundland lies an 1,100-mile expanse of the Appalachian Mountains, a picture-perfect corner of the Canadian wilderness: Gros Morne National Park. Embark on a sensory adventure through a land of glacier-carved fjords, cascading waterfalls, and soaring cliffs.

#BAM301 \$119: DVD

Streaming Rights (3 year) - Single Site (K-12): \$119

Atacama Desert, Chile

Stretching along 600 miles of Northern Chile's Pacific coast is the driest non-polar region on Earth: the desolate Atacama Desert. From menacing volcanoes to wondrous natural geysers, experience one of South America's last great wild lands, one that few have ever laid eyes on.

#BAM302 \$119: DVD

Streaming Rights (3 year) - Single Site (K-12): \$119

Bolivia

Beneath the blazing Bolivian sun lies a land of extremes, ranging from desolate highland plateaus to dormant volcanic landscapes. But the true wonder of this astonishing land is Salar de Uyuni--an endless salt flat so blindingly white it can be seen from outer space.

#BAM303 \$119: DVD

Streaming Rights (3 year) - Single Site (K-12): \$119

Utah

The desert landscape of Utah is home to one of the world's most spectacular and unforgiving natural settings: Zion National Park. A 100,000-square-mile marvel of deep canyons, majestic arches, and towering sandstone walls, it's a land shaped by unimaginable geological forces over millions of years.

#BAM304 \$119: DVD

Streaming Rights (3 year) - Single Site (K-12) : \$119

Lake Superior

Lake Superior is a rugged natural wonder and an ancient haven for remarkable geological and cultural history. Step into the picturesque settings of one of North America's most important natural regions and learn about the unique history of its indigenous people.

#BAM307 \$119: DVD

Streaming Rights (3 year) - Single Site (K-12): \$119

Arizona, Canyon Country

Journey to the outback of southern Utah and northern Arizona, where towering rock spires give way to sweeping canyons in one of the most majestic American landscapes. From Glen Canyon to the Paria Plateau, explore these natural wonders and the ancient geological secrets they hold.

#BAM305 \$119: DVD

Streaming Rights (3 year) - Single Site (K-12): \$119

Bahamas

Take in the Bahamas as you've never seen them before, from towering pine forests to dense coastal mangroves. The most daunting and unexpected attractions, however, are its flooded inland caves--geological wonders adorned with otherworldly stalactites that shimmer in the darkness.

#BAM306 \$119: DVD

Streaming Rights (3 year) - Single Site (K-12): \$119

Undiscovered Vistas

Wonderful series for your Geography, Social Studies, Science, First Nations Studies curriculum

Niagara Escarpment

The visual magnificence of the Niagara Escarpment is only really matched by the richness of its First Nations lore, dotted with epic tales of heroic figures and mysterious spirit worlds. Immerse yourself in the dazzling geological attractions of this truly historical corner of North America.

#BAM308 \$119: DVD

Streaming Rights (3 year) - Single Site (K-12): \$119

The Bay of Fundy

The Bay of Fundy, on Canada's east coast, is home to the world's highest tides. These surging waters and the mudflats below it, sustain an abundance of creatures. It is a bay ruled by powerful currents that unearth 300-million- year-old mysteries and continue to govern communities that live in sync with the rhythm of its restless tides.

#BAM311 \$119: DVD

Streaming Rights (3 year) - Single Site (K-12): \$119

Iceland Fire

Iceland is the world's largest volcanic island. This lone and rugged island is a volcanic hotbed where steam escapes, water explodes and new ground is borne every day from deep inside the earth's blazing core. Fire and ice collide in a colossal battle for supremacy. It is an epic struggle that makes Iceland the most geologically powerful island on earth.

#BAM309 \$119: DVD

Streaming Rights (3 year) - Single Site (K-12) : \$119

Iceland Ice

While Iceland was built by volcanoes, it was sculpted by ice. About 1.5 million years ago, a massive sheet of ice descended from the north and covered the island. Today, massive glaciers continue to carve marine cliffs and cut down mountains. But as global temperatures rise and glaciers melt, what will become of Iceland?

#BAM310 \$119: DVD

Streaming Rights (3 year) - Single Site (K-12): \$119

Vancouver Island

The wild Pacific coast of Vancouver island is an ancient and rugged landscape off the western shore of British Columbia. From the icy peaks of age-old mountain glaciers to the fog- shrouded canopies of Canada's only rainforest, it is the wettest place in North America: a primitive habitat where the Pacific Ocean holds the key to life and where nature and the human spirit coexist. It is a paradise for creatures adapted to life by the sea and is home to one of the most sacred sites on Earth - a beautiful and hidden landscape that continues to preserve ancient ways of life.

#BAM314 \$119: DVD

Streaming Rights (3 year) - Single Site (K-12): \$119

Wales

Along the west coast of Great Britain, the world's longest uninterrupted footpath forges through more than 800 miles of breathtaking scenery. Wind and waves carve, shape and chisel this majestic coast. Coves eroded by the power of the ocean shelter colonies of seals, rolling hills and valleys are manicured by sheep. The wild coast of Wales teems with life, reveals geological mysteries and chronicles centuries of human history.

#BAM312 \$119: DVD

Streaming Rights (3 year) - Single Site (K-12): \$119

Ireland

Ireland is small in size but epic in wonder. This is a land that has been shaped and reshaped by the power of water and violent geological forces. Ireland's mountains and cliffs, its valleys and lakes will continue to rise and fall with the passage of time - on a scale far beyond the realm of mere mortals.

Streaming Rights (3 year) - Single Site (K-12): \$119

Arctic Secrets Series

Grades 6 - Post-Sec 2016 CC 60 min each Blue Ant Media
We journey to the most remote Arctic landscapes, populated with animals and plants that have adapted to survive in the harshest climates on the planet. Using remote camera technology, ARCTIC SECRETS explores this land through spectacular, and never-before-seen, aerial panoramas.

***SPECIAL SERIES PRICE - ONLY \$495 (5 programs)- Series #BAM315
- a saving of \$100***

Individual titles: \$119 each (DVD or streaming)

Land of Extremes

Land of Extremes is our introduction to the Arctic and many of the themes and ideas we explore throughout the series. This episode visually illustrates how the Arctic, locked in darkness for nearly seven months, springs to life once the sun rises above the horizon. We explore ideas of migration, hibernation, the food web, habitat change, and are introduced to some of the Arctic's most magnificent and iconic creatures and its most dramatic landscapes.

#BAM316 \$119: DVD

Streaming Rights (3 year) - Single Site (K-12) : \$119

Land of Ice

Devon Island is the largest uninhabited island in the world. It's so remote and forbidding that when scientists wanted to simulate living conditions on Mars, they chose Devon. Dry and desolate, Devon's barren landscape only supports the hardiest of plants and few animals. For most of the year, darkness dominates the land. The sea ice surrounding Devon is continuous and solid. When the sun returns in spring, it will not set for four months. The unrelenting light warms this frozen desert and the ice begins to move. Shifting sea ice on the water ruptures with long cracks, called leads. Polar bears and seals are locked in a deadly battle. In this episode we capture what many consider to be a rare human experience as we witness the stark beauty of this icy wonderland.

Streaming Rights (3 year) - Single Site (K-12): \$119

Can be used for your Geography, Social Studies, Science, Canadian History, First Nations, Métis & Inuit Studies and Language Arts courses

Islands of the Delta

The Western Arctic's mammoth Mackenzie Delta is the second largest in North America after the Mississippi. It is a biological "hotspot", a transition zone between ecosystems - from the familiar boreal forest, across the tree line to the ever-frozen tundra. Here we find strange and mysterious landforms above an immense underbelly of permafrost featuring a phenomenal diversity of microorganisms, and strange creatures that tell a story of an ever changing Arctic. This is the migratory destination - and summer home - to several million birds, fish, animals . . . and humans.

#BAM318 \$119: DVD

Streaming Rights (3 year) - Single Site (K-12): \$119

Fall on the Tundra

Nunavik is a pristine wilderness of water, forest, and tundra, and home to the Inuit of Northern Quebec. In the fall, the tundra erupts in all shades of red, orange, yellow and purple. Wildlife and people get ready for the winter. The Ptarmigan spends fall's shortening days eating plants and berries in a hurry. Like all wildlife that winters in Nunavik, it is fattening up for the hardship ahead.

#BAM319 \$119: DVD

Streaming Rights (3 year) - Single Site (K-12): \$119

Wild Seas

On the north-east coast of Baffin Island, in Canada's Arctic, lies Ninginganiq, a blustery wilderness where only the intrepid travel. The Inuit have lived here for thousands of years navigating around the dangerous sea ice for hunting and fishing in their umiaks and kayaks. As winter nears, one of Nature's great spectacles unfolds here, rarely witnessed by humans. Giant bowhead whales gather to feed and socialize. This area is also impacted by El Nino. With climate change, the wild seas of Ninginganiq grow more savage every year.

Producer Profile

Matt LeMay

McIntyre Media Inc. proudly works in partnership with Matt LeMay (LeMay Media & Consulting.) Matt is a multiple award winning filmmaker and communications specialist. In 2016, Matt received the Rising Star Award at Canada's International Film Festival in Vancouver for his new documentary on *Truth and Reconciliation* (see page 16). Matt's Métis heritage gives him a unique and honest viewpoint in exploring a variety of social issues impacting First Nations communities across Canada.

Learning About Treaties in Canada (Elementary version)

Grades 4-8 2016 CC 18 min LeMay Media

Aboriginal people lived in Canada long before European settlers and explorers arrived here. They lived in harmony with their environment and cared for the land and water they depended on for survival. The concept of land ownership was foreign to them. The arrival of Europeans had a drastic impact on their lives. In **Learning About Treaties in Canada**, elementary students will come to understand the circumstances that led to the process of treaty making including the fur trade, western and northern expansion, and the 7 Year War. Treaties are compared to promises or solemn covenants. We begin to understand how their negotiation was flawed and how First Nation peoples lives were affected not only in the past, but also

how the process still impacts the First Nations community today. From award-winning Métis filmmaker Matt LeMay.

The History of Treaties in Canada

The History of Treaties in Canada (Secondary/Post-Secondary version)

Grades 9-Post-Sec 2016 CC 14 min LeMay Media

From the Royal Proclamation of 1763 to the implementation of the modern-day Algonquin land claim, **The History of Treaties in Canada** explores the history, application and legacy of these foundational legal documents and how they continue to shape and define the often strained relationships between First Nations and the Crown in Canada. Viewers learn about the creation of reserves, land rights issues, the spirit and intent of treaties, the development of legislation, the creation of residential schools, and modern-day treaty negotiation. Written and produced by award-winning Métis filmmaker Matt LeMay, this new video is a valuable resource for your History, Canadian Studies, Law, First Nations, Métis and Inuit Studies and Civics classes.

The Métis in Canada

Grades 6-12 2016 CC 11 min LeMay Media

One of the greatest gifts to emerge from the early settlement of the new world was an entirely new race of people that would be known as the Métis. Recognized officially as one of Canada's three aboriginal peoples, the Métis had a distinct way of life that incorporated aspects of both European and indigenous cultures. The term Métis means "mixed-blood" in French. It comes from the French word *métisser*, which means "to mix". The Métis have a fascinating and unique culture and language. They have played an instrumental role in shaping the Canada we know today. Narrated and produced by multi award-winning Métis filmmaker Matt LeMay, ***The Métis in Canada*** provides the viewer with a compelling overview of the history, culture and heritage of the Métis people including information on Louis Riel, the Red River Rebellion, the Métis sash, the Métis flag and the importance of dance and music.

Missing and Murdered Aboriginal Women in Canada

Grades 9-Post Sec 2016 CC 12 min
McIntyre Media Inc.

Violence against women is a significant issue in society. According to the World Health Organization, it affects one third of women around the world. Violence against women is also a serious issue in Canada, unfortunately.

One particular group of Canadian women merit special attention: Indigenous women and girls in Canada experience a scale and severity of violence that constitutes a national human rights crisis.

The issue of violence against aboriginal women and girls is a systemic one with deep roots in sexism, poverty and racism. To properly address the situation, one must understand the history and impact of colonization on Aboriginal peoples in Canada. There has been a cycle of trauma and abuse brought on by residential schools, and by the 60s Scoop – where large numbers of aboriginal children were forcibly taken into the child welfare system. Government and church have interfered with First Nations traditional practices for over 500 years.

This informative video gives an overview of the history of trauma and abuse experienced by Aboriginal women in Canada. We trace its roots from early colonialism in Canada to recent actions by the Canadian government, the Truth and Reconciliation Commission, and the release of the RCMP Report on Missing and Murdered Aboriginal Women in Canada.

Truth & Reconciliation

The Legacy of Residential Schools in Canada

Truth and Reconciliation:

The Legacy of Residential Schools in Canada

Grades 6-Post-Sec 2016 CC 30 min LeMay Media

This program examines the history, legacy and current impacts of the Residential School experience in Canada. From the establishment of the early Residential Schools to the work of the Truth and Reconciliation Commission, this film shines a light into this dark chapter of Canadian history. Written and directed by multiple award winning Métis filmmaker Matt LeMay, this poignant documentary features interviews with Phil Fontaine (Former National Chief of The Assembly of First Nations), Shawn Atleo (Former National Chief of The Assembly of First Nations), Dr. Marie Wilson (Truth and Reconciliation Commissionaire), Dr. Mike Degagne (Former Executive Director of the Aboriginal Healing Foundation), and Martha Marsden (Former Residential School Survivor).

#LM0007 \$119: DVD

Streaming Rights (3 year) - Single Site (K-12) \$119

The Impact of Colonialism in Canada

Grade 7-Post-Sec 2016 CC 15 min LeMay Media

The Impact of Colonialism in Canada

Prior to the arrival of Europeans, First Nations people were a richly diversified, self-sufficient culture living in various areas of Canada. Much of that changed with the arrival of the first Europeans.

Colonization is the action or process of settling and establishing control over the indigenous people of an area disconnecting them from the land, their history, their identity and their rights so that others benefit. It is a basic form of injustice, and has been condemned as a practice by the United Nations.

In this new production from award-winning Métis filmmaker Matt LeMay, we explore the history and consequences of the Canadian Government attempting to assimilate Canada's Indigenous population. We explore the Indian Act, the establishment of the Canadian Residential School system, broken treaty promises, and the 60's scoop. This video will educate the viewer as to why so many of Canada's First Nation communities face serious sociological and economic challenges.

Understanding Refugees in Canada

Grades 6-12 2016 CC 20 mins McIntyre Media Inc.

In this Canadian-produced video, students will begin to understand the current refugee situation as well as the history of refugees in Canada and their contributions to our culture and society. Learn the reasons why people leave their home, families and possessions and walk away to an uncertain and often frightening future elsewhere. Understand that the issue of human rights is central to refugee status. An excellent snapshot of Canada's response to refugees dating back to the Irish Potato Famine, the "Boat People," to the current Syrian refugee crisis.

FRONTLINE: Children Of Syria

Grades 11-Post-Sec 2016 CC 60 min PBS

Since 2011, millions of Syrians have fled the brutal fighting inside their country, seeking safety, stability, and the chance at a better life in an exodus that has helped to fuel Europe's largest migration crisis since the end of World War II. Against this

backdrop, Children of Syria is an unforgettable story of both sadness and survival, and a profound exploration of identity, family and the meaning of home.

Filmed on the ground as the fighting rages, the documentary follows four Syrian children--Sara, Farah, Helen, and Mohammed--over three years, from their struggle to live through the Assad regime's siege of their home city Aleppo, to the devastating kidnapping of their father, to the beginning of their new lives as refugees in Germany, ever cognizant of all they've lost and left behind.

With the Syrian war in its sixth year, its death toll now estimated at 470,000, and thousands of refugees arriving in Europe every day, FRONTLINE's Children of Syria is a story of war, grief, hope, and what it means to start again.

1916: The Irish Rebellion

Grades 9-Post-Sec 2016 CC 180 min PBS

On Easter Monday 1916, a small group of Irish rebels - including poets, teachers, actors, and workers, took on the might of the British Empire. Although defeated militarily, the men and women of the Easter Rising would soon win a moral victory with their actions leading to the creation of an independent Irish

State and contributing to the eventual disintegration of the British Empire. They have inspired countless freedom struggles throughout the world - from Ireland to India.

The Secret History of ISIS: FRONTLINE

Grade 11- Post-Sec 2016 CC 60 min PBS

The Secret History of ISIS investigates the inside political story of how the American invasion of Iraq

and the decisions of two Presidents helped to lay the groundwork for ISIS to grow into the world's most feared terrorist

group. Going behind the headlines, the film shows how Abu Musab al-Zarqawi, a one-time thug turned jihadi leader, was able to outmaneuver the American government for a time and build a brutal terrorist organization that would destabilize the Middle East and inflict violence around the world.

From veteran FRONTLINE filmmaker Michael Kirk and his acclaimed investigative team, *The Secret History of ISIS* is essential viewing for anyone who wants to understand how ISIS came to be, and how we got here.

Benghazi in Crisis: FRONTLINE

Grade 11 - Post-Sec 2016 CC 60 min PBS

This two-part hour from FRONTLINE features *Benghazi in Crisis* and *Yemen Under Siege* - two short documentaries

filmed in the heart of major conflict zones.

First, in *Benghazi in Crisis*, journalist Feras Kilani

goes inside the war-torn Libyan city of Benghazi and reveals firsthand just how chaotic the situation there has become, as ISIS, other Islamist militants, warring militias and the Libyan army all fight for control. This documentary is a rare and grim look inside Benghazi as the fighting intensifies.

Then, in *Yemen Under Siege*, journalist Safa Al Ahmad (*The Fight for Yemen*) makes a dangerous return to Yemen and captures the chaos on camera. Hundreds of thousands of people have fled Taiz, Yemen's third-largest city, and for those that remain, life is nearly unbearable. The documentary reveals the conflict's stunning human toll as it's rarely seen.

**Polly Higgins: Making Ecocide an International Crime**

Grades 11-Post-Sec 2016 CC 68 min Paper Tiger
This episode of *The Green Interview* features lawyer Polly Higgins, who in 2010 proposed to the United Nations that a law of Ecocide to be classed as the 5th Crime Against Peace. She defines ecocide as the “extensive damage, destruction to or loss of ecosystems of a given territory, whether by human agency or by other causes, to such an extent that peaceful enjoyment by the “inhabitants” of that territory has been severely diminished.” The term inhabitants here includes ALL living beings, not just people.

#PT0008 \$159: DVD

Streaming Rights (3 year) - Single Site (K-12): \$159

**Anders Hayden: A Good Life Redefined**

Grades 11-Post-Sec 2016 CC 53 min Paper Tiger
This episode of *The Green Interview* features Anders Hayden, author of *Sharing the Work Sparing the Planet* and *When Green Growth is Not Enough: Climate Change, Ecological Modernization, and Sufficiency*. A leading proponent of new work schedules, Hayden argues that working people have historically pushed for reduced hours since the start of the industrial revolution to create more jobs and to “live dignified and healthy lives,” but that today there is an additional recognition of ecological limits. He argues that the idea of infinite growth is no longer an option at a time when current levels of consumption in industrialized countries have become unsustainable and that the promise of the benefits of technological advance and growth have also not been realized. He says that we should be focusing on sufficiency rather than efficiency and that it’s time to collectively advance a new vision of wealth, one that offers real security and wellbeing.

Superlife: Genetic Manipulation Series

Recommended: Video Librarian

Grades 9-Post Sec 2015 CC Film Ideas

Designing Life. Man has been doing it for over 10,000 years. You may not be aware of it, but we are surrounded by “Superlife,” life-forms manipulated by Man. *Superlife* looks at the stories of how these super organisms came to permeate our planet, and how the latest science is pushing the boundaries to create more with less time and resources and at a higher quality.

Superlife explores the science of how mankind is manipulating life for its benefit. The series does not attempt to address the concerns surrounding cloning, genetically modified organisms or the ethics of certain farming practices.

Titles include:

Superfoods

The planet’s population now tops 7 billion. In this environment, humans create more with less time and resources and at a higher quality. Today, the latest science might allow for small fish to bear big fish, or even “grow” meat without the animal. Featuring:

- Super Cow: The Belgian Blue- A testament to the potency of selective breeding
- Super Corn: The King of Grains- Genetic engineering to reduce chemical use and increase yield
- Super Egg Layer: White Leghorn- Molecular genetics team uses DNA tech to achieve uniform quality
- Wine Grape: The Hybrid Grape- Reintroduction of genetic diversity for disease resistance
- Super Tuna: Cross-species Surrogacy- Interspecies cell implantation
- Test-tube Burger: Cell Culture- Artificial culturing of stem cells into muscle cells

Wonderful World of Blood

Grade 9 – Post-Sec 2015 CC 52 min BBC

This fascinating film sees Michael Mosley put himself through some extreme challenges to discover how our blood protects us from infection, heals us when we’re wounded, and powers our lives. He undergoes experiments including entering a low-oxygen environment to supercharge his blood and boost his physical fitness; poisoning his blood with a vial of viper venom in order to see it clot; doing a state-of-the-art body scan to

chart every artery and vein in his body; and going white-water rafting to discover how his blood’s defenses combat stress. The program explores the dark mythology around blood, and meets the scientists on the cusp of discovering whether there’s any truth in the “Dracula myth” – that young blood can reverse the ageing process. Packed with absorbing stories, the *Wonderful World of Blood* is a comprehensive take on a subject that’s central to our survival.

Making North America: NOVA

Grades 10 – Post-Sec 2015 CC 180 min PBS

Mighty, elemental forces molded North America—fiery eruptions, titanic floods, the grinding of great ice sheets, and massive impacts from space all shaped our homeland. The epic three-part series unfolds in a forgotten world that existed long before our own, crossed by long-lost mountain ranges, deserts the size of Africa, and vast inland seas spanning the length of the continent. Explore beloved landmarks like the Grand Canyon and Niagara Falls from the inside out as we witness the clash of nature's creative and destructive forces. Hosted by renowned paleontologist Kirk Johnson, this spectacular road trip through a tumultuous deep past explores three fundamental questions: How was the continent built? How did life evolve here? And how has the continent shaped us? "Making North America" reveals the incredible story of a majestic continent.

Frogs: The Thin Green Line

Grades 9-Post-Sec 2016 CC 60 min PBS

Frogs have been on this planet for more than 250 million years, evolving into some of the most wondrous and diverse creatures on earth. Today, they are at the centre of one of the greatest mass extinctions since the dinosaurs. It is an environmental crisis unfolding in our own backyard as well as around the globe. Where the calls of frogs

once filled the air, scientists now hear only silence. Ecosystems are beginning to unravel, and important medical cures are vanishing. A fungus called chytrid has been identified as the major culprit, but no way has yet been found to stop it.

Bystander Intervention: Putting a Stop to Bullying

*Grades 7-Post-Sec 2016 CC 20 min
Human Relations Media*

Bystander intervention is a new and proven effective strategy to reduce incidents of bullying and other forms of violence and intimidation. The video first defines bystander intervention then models how it works by showing dramatizations of bullying which stop at critical points and ask viewers:

What would you do? Viewers learn to put their own safety first, and then learn how to best apply bystander intervention techniques: direct intervention, distraction, calling 911, and reaching out to trusted adults. In addition, teens describe how they successfully used bystander intervention to stop or distract a bully.

*#600672 \$189: DVD, plus teacher's resource book, student handouts and pre/post tests in digital format.
Streaming Rights (3 year) - Single Site (K-12): \$189*

Bystander Intervention: Putting a Stop to Sexual Assault

*Grades 7-Post-Sec 2016 CC 20 min
Human Relations Media*

This program carefully explains the basics and principles of bystander intervention, a strategy that has proven effective in the reduction of sexual assault. The video begins by dramatizing the infamous Kitty Genovese case where many observers did not step in to prevent an assault in Kew Gardens, Queens, New York. This behaviour came to be called the

Bystander Effect. Bystander intervention, as explained in the video, is a powerful tool that arms bystanders with techniques to counter the bystander effect by getting witnesses to stop violent acts or sexual assaults by using their brains. Using dramatizations of sexual assault situations viewers are taught three ways to disrupt a sexual assault: intervene directly, create a distraction, or call for help from others nearby. Teens who have successfully intervened in attempted sexual assaults describe how they followed the principles and foiled an attempted sexual assault.

*#600671 \$189: DVD, plus teacher's resource book, student handouts and pre/post tests in digital format.

NOVA: Memory Hackers

Post-Sec 2016 CC 60 min PBS

Memory. Whether it's sharp, fuzzy, poignant, or thrilling, it's the glue that binds our mental lives. Without it we'd be prisoners of the present, unable to use the lessons of the past to change our future. From our first kiss to where we put our keys, memory represents who we are, and how we learn and navigate the world. But how does it work?

For the first time, using cutting-edge research, neuroscientists are exploring the precise molecular mechanisms of memory. By studying individuals ranging from an 11-year-old whiz kid who remembers

every detail of his life, to a man who had his spider phobias vanquished, to a woman who even had memories implanted, scientists have uncovered a provocative idea. For much of human history, memory has been seen as a tape recorder that faithfully registers information and replays it back intact. But now, researchers are discovering that memory is far more malleable, always being written and rewritten, not just by us but by others. As we are discovering the precise mechanisms that explain and can even control our memories, the question is—are we ready?

Power and the World's Women

Grade 9 – Post-Sec 2015 CC 50 min BBC

In 1995, while still First Lady, Hillary Clinton made a groundbreaking speech in Beijing, setting down a challenge to world leaders: to treat women's rights as human rights. She highlighted abuses including young girls sold into slavery; women raped as a tool of war; and lack of education for girls. Since then, three women – Madeleine Albright, Condoleezza Rice and of course Clinton herself – have done one of the world's most powerful jobs, as U.S. Secretary of State. In candid interviews, these former Secretaries of State talk about what it's like being a woman at the center of power, how they personally tried to change

things, and about the political challenges of improving the lives of women across the world. The film reveals the shocking extent of abuses in some developing countries and conflict zones, and asks what Western politicians should – and should not – do to promote women's rights and equality. And as the U.S. waits to hear if Hillary Clinton will make a second attempt at the U.S. presidency, the film asks if America is ready to break the biggest glass ceiling of all – and what a woman President of the U.S.A. could do for the world's women?

Producer Profile

Sean Cisterna

McIntyre Media Inc. proudly works in partnership with Sean Cisterna. Sean is a feature film producer and director who has worked in the film and television industry in Canada for over 15 years. Several of his feature films, including *Full Out* and *Moon Point* have received international accolades. In addition to his features, Sean has worked with McIntyre Media for over 8 years producing over 50 of our best-selling curriculum programs. Included in this list is **OUR CANADA: Its Geographic Regions**, a 7-part visual masterpiece that takes students on a visual journey across our great country (see pages 6 & 7); **Understanding Refugees in Canada** (page 17); and **Made in Canada** (page 35).

Made in Canada Series: Canadian Entrepreneurship

Grades 9-Post-Sec 2016 CC 30 min CTV

Canada is a hotbed of innovation and ambition. In this world of accelerating and constant change, many opportunities and challenges will arise. In this series of segments from CTV, students get to hear and see the stories of five Canadian entrepreneurs who have worked hard to build successful companies. Each has found and met a need of its customers. However, that success was borne out of hard work, education, initiative, research, and a willingness to adapt to a constantly changing world. In each segment, we meet some of the entrepreneurs as well as learn and see how the manufacturing process happens.

#CTV691 \$199: DVD (includes 5 segments listed below)

Streaming Rights (3 year) - Single Site (K-12): \$199

Segments include:

Manitobah Mukluks

Manitobah Mukluks is a company that has embraced aboriginal culture and become an internationally known business. In 1996, Sean McCormick set up an operation in Winnipeg where he swapped leather and furs for handmade mukluks made by First Nations' women.

McCormick, who is Métis, soon saw that retailers couldn't get enough of the beaded, animal skin footwear, and the idea for a company was born.

Clearpath Robotics

Clearpath Robotics designs and manufactures unmanned systems that can be used for mining, military, academic, and industrial applications. CEO and Founder Matt Rendall developed an interest in building robots and that eventually led

to the 2009 development of his multi-million dollar company.

Research Casting International

Peter May founded Research Casting International Ltd. in 1987, based on experience gained from collecting, preparing, casting and mounting dinosaur fossil bones at the Royal Ontario Museum and the Royal Tyrell Museum of Paleontology.

The Original Maple Bat Corporation

Sam Holman founded The Original Maple Bat Corporation in 1997, the year that he introduced maple to professional baseball. The company is often referred to by the name of its record setting product, "Sam Bat". Sam Bat grew out of a simple challenge – a professional baseball scout asked Holman to make a bat that wouldn't break.

Conquest Vehicles

William Maizlin is a Canadian entrepreneur who started the company Conquest Vehicles Inc. with a better option in mind. Headquartered in Toronto, his facility houses some of the best engineers, fabricators and technicians in the country, all tasked with building the ultimate, fully armoured, ultra-luxurious SUV called the Knight XV.

The Secret World of Lego

Grades 9-Post Sec 2015 CC 47 min Films Media Group

Billund, Denmark is home to the original Lego factory that produces over 1 billion bricks per week. Lego is a brand that stretches beyond the children's market and has a huge following of AFOLs (Adult Fans of Lego). This film follows Justin and Mark as they attempt to become part of the Lego company. Justin aspires to become a Lego designer while Mark wants to launch a magazine marketed to adults who enjoy building with Lego. See inside the Lego factory, get a feel for Lego culture, and stretch your imagination with ideas presented in this video.

Honey Guide

Dottie the owl tells Anansi Spider about a honey comb she finds in the park but she needs Anansi's help to reach it. Anansi happily retrieves the honey but decides to keep it the all for himself. "Why should I share?" he says. "I did all the work!" And he eats all the honey in front of Dottie. Dottie feels tricked so she quickly makes some new friends that also love to eat honey and they remind Anansi that when we make a deal with friends we must keep our promises.

The Tablet of Wisdom

Taji the Turtle finds a treasure that may have the wisdom of the whole world inside. He wants to share it with everybody he can. He puts Anansi in charge of finding a way to spread this wisdom all over the park but Anansi is only interested in finding a way to keep all the wisdom for himself. But in a strange twist of events he learns that nobody can have all the wisdom, we can only collect pieces of it from everybody we meet.

Unlocking Your Potential: Grit, Determination, and Mindset

Grades 7-12 2016 CC 20 min

Human Relations Media

"I just can't do this." That's the reaction of too many teens when they face academic and personal challenges. As a result, these students struggle to reach their goals. This program describes new research that informs students how to discard the I can't mindset and replace it with the I can mindset.

This program explores how intelligence and talent can be developed through hard work and persistence. It emphasizes the importance of embracing challenges and viewing failure as a way to learn. Students are encouraged to evaluate their own mindsets and to think about the importance of grit and determination in their own lives.

The program profiles four people whose mindsets embrace the qualities of grit and determination. A student with a learning disability has "learned how to learn" through strategic study skills, and the perseverance he exhibits academically helps him succeed in sports as well. A severely handicapped young man refuses to let the challenges of his physical condition prevent him from pursuing a career as a comedian and substitute teacher. A teenage singer describes the importance of practice in developing her skills and how she learns from constructive criticism. A young man pushes hard to advance his education and pursue a career in psychology despite stereotypes in his community that discourage him from attending a post-secondary institution.

Rise of the Robots: NOVA

Post-Sec 2016 CC 60 min PBS

Machines are everywhere. They run our factory assembly lines and make our coffee. But robots - machines with human-like capabilities-have long been the stuff of science fiction. Until now.

Fueled by an ambitious DARPA challenge, the race is on to design a robot that can replace humans in disaster relief situations. Follow the robots - and the engineers that program them-as they strive to make their way out of the lab and into the real world. But how capable are they, really? How close are we to a future where humanoid robots are part of our everyday lives? And what are the implications of a future with robots that can do a human's job? NOVA investigates the cutting-edge technologies that are advancing robotics as never before...and the enormous challenges that the robots still face.

Blackout: AMERICAN EXPERIENCE

Post-Sec 2015 CC 60 min PBS

On July 13, 1977, the lights went out in New York. Seven million people were plunged into darkness. In the city that never sleeps, the divide between the haves and the have-nots became ever more apparent, as mayhem broke out under the cover of darkness. By the time the lights went back on more than a day later, more than 1,600 businesses had been looted, over 3,700 people had been arrested, and firefighters had battled more than 1,000 fires. Told through the memories of ordinary New Yorkers who lived through the events, *Blackout* explores what happened on the night the lights went out.

Adding Talk to the Equation

Teacher Education 2016 123 min Stenhouse Publishers

For more than twenty years, Lucy West has been studying mathematical classroom discourse. She believes that teachers need

to understand what their students are thinking as they grapple with rich mathematical tasks and that the best way to do so is through talking and listening. *Adding Talk to the Equation* helps teachers learn how to skillfully lead math conversations so all students stay in the game, stay motivated about learning, and ultimately deepen their understanding.

This video features five case studies filmed in grades 1–6 and shows teachers at various stages in their practice of generating and managing rich mathematics conversations. Lucy emphasizes the progression that occurs as teachers get more comfortable with new talk moves and as they learn to tune in and respond to the math conversations taking place among their students. Although these discussions occur during math instruction, the strategies used to create an environment for respectful, productive discourse can be applied to any subject area.

The video segments examine the importance of creating a safe learning environment; the value of thinking, reasoning, and questioning; the role of active, accountable listening; and the necessity of giving all students a “You can do this” message. Lucy also emphasizes that slowing down, even in the face of time constraints, is crucial for creating a classroom where all students feel they have something to contribute.

The video is accompanied by an 84-page companion guide (in PDF format on a disc) which includes transcripts of all of the case studies, with detailed commentary from Lucy that gives you a window into her thinking and the complexities of the work she is doing with teachers, as well as her reflections on missed opportunities.

#000171 \$250: DVD, PDF guide

Streaming Rights (3 year) - Single Site (K-12): \$250

Genius of the Modern World

Grades 11-Post Sec 2016 CC Films Media Group

Karl Marx, Friedrich Nietzsche and Sigmund Freud changed the landscape of the modern world. Together they re-

imagined global economics, questioned the very foundations of morality and society, and unravelled the workings of the human mind. Their challenge was to figure out what makes us human in a fast-evolving world, and to identify the hidden forces, and ideas, controlling our lives. It was a search that would drive Marx to poverty, and Nietzsche to psychological breakdown. Host Bettany Hughes discovers how these sceptical 'masters of suspicion' created ground-breaking, penetrating ways of seeing the world that still shape how we make sense of our lives today.

SPECIAL SERIES PRICE - ONLY \$675 - a saving of \$38.85

Series #394892

Individual titles: \$237.95

Fall in Love with Music Series

Grades 11-Post-Sec 2016 CC 26 min each Films Media Group

Based on the precepts and teaching strategies of his mentor, Dr. Saul Feinberg, Maestro George Marriner Maull's popular listening course, *Fall in Love with Music*, has been enjoyed by thousands of participants in lecture and classroom settings over the past 35 years. This series from The Discovery Orchestra configures this four-hour course into eight 26-minute episodes.

SPECIAL SERIES PRICE - ONLY \$1400 - a saving of \$55.60 - Series #394896

Individual titles: \$181.95

The Series Includes:

Our Musical Focus

Maestro George Marriner Maull challenges viewers to become aware of the difference between hearing and listening. Using Movement 3 of the Music for Strings, Percussion and Celesta by Bela Bartok, viewers are invited to become insiders in the ways of composers and to notice details right from the start.

#394897 \$181.95: DVD

Streaming Rights (3 year) - Single Site (K-12): \$181.95

Why Aren't We Listening?

Maestro George Marriner Maull provides an often humorous look at the distractions and cultural influences in our society that actually train us not to listen.

#394898 \$181.95: DVD

Streaming Rights (3 year) - Single Site (K-12): \$181.95

Is This Music?

Maestro George Marriner Maull explores the importance of having an open mind as a listener.

#394899 \$181.95: DVD

Streaming Rights (3 year) - Single Site (K-12): \$181.95

The Elements of Music

Maestro George Marriner Maull presents viewers with a definitive list of musical elements on which a perceptive listener can focus as music is performed.

#394900 \$181.95: DVD

Streaming Rights (3 year) - Single Site (K-12): \$181.95

How Listening Affects Us

Maestro George Marriner Maull begins with a mental puzzle to show how composers cross boundaries to create effective surprise, a device eliciting an emotional response in listeners.

#394901 \$181.95: DVD

Streaming Rights (3 year) - Single Site (K-12): \$181.95

Paragraphs Without Words

Maestro George Marriner Maull introduces the idea that perceptive listeners learn to absorb larger segments of musical information – similar to paragraphs in written and spoken language.

#394902 \$181.95: DVD

Streaming Rights (3 year) - Single Site (K-12): \$181.95

Leave it to Beethoven

Maestro George Marriner Maull reviews musical elements covered in previous episodes. He applies these concepts to Movement 4 of Beethoven's String Quartet Opus 18, No. 3 in D Major, performed by the Amphion String Quartet.

#394903 \$181.95: DVD

Streaming Rights (3 year) - Single Site (K-12): \$181.95

Putting It All Together

In the final episode of his musical education series, Maestro George Marriner Maull revisits a number of previously presented musical devices, such as sequence, that are found in the work.

OUR CANADA:

Its Geographic Regions Series

Produced for Canada's 150th Birthday, this visual masterpiece will take students on a visual journey across the country. Sweeping vistas, spectacular mountain ranges, majestic rivers, rolling plains, vibrant cities and towns capture the beauty of this wonderful country. Accurate, up-to-date content explores Canada's six physiographic regions. From the Cordillera to the Appalachians to the Arctic, students will get a broad understanding of the geography of each region, including geology, population and settlement patterns, industry, vegetation and wildlife, and an overview of original settlement by various First Nations groups.

Included is information on our continuing struggle to build a sustainable environment where students will learn to become responsible, active citizens.
