Playlist Package Collections

Each of our PLAYLISTS is a package of programs that is hosted by McIntyre Media and streamed directly to your institution. They are HIGHLY DISCOUNTED selections of some of our most popular programs. Each fits a particular theme/curriculum unit. Call for information.

Custom Playlist Packages

You create your own playlist. It's simple! You select the titles you want. Call us and we will set it up. Within a short time, you, your institution, faculty and students will have access to the programs you have purchased.

Hosting

Let us host the content for hassle-free anytime, anywhere delivery. We can also host 3rd party content. Or if you have produced content and want to access it in an easy to use interface, this is a great option for you.

Indicates product produced in Canada.

We are developing a Core streaming platform for each province. Look for the CORE logo to see if programs are included in the platform and contact us to ask about correlations for your province.

McIntyre Streaming Services offers an easy to use hosted streaming platform that takes the hassle (or headaches) out of managing local streaming servers. We have been providing hosted streaming to Colleges, Universities, School Boards and Districts, Health Agencies and Government institutions for many years.

Don't get tied up in aging and expensive infrastructure! Let us host your content for you.

Our streaming service offers you many different services to choose from. You can pick the basic hosting service that will allow you to stream content 24/7 and is mobile device friendly.

ng Services

Features:

The basic service also includes the following features:

- Your institution logo at the top of the hosting page.
- Chapters (where available) with searchable descriptions
- Unique URLs per title which can be integrated into your catalogue for easy access.
- Metadata for cataloguing and the ability to export metadata by date range.
- Administration Portal to view usage stats.
- Embed Code to easily integrate content in a Learning Management System.

Additional Services:

We also offer additional services such as closed captioning and transcript creation.

McIntyre Streaming Services provides a stable environment for you to host videos and documents with new features being added on a regular basis.

Call today for pricing.

Packages

Canada Over the Edge is an aerial-documentary series exploring the features that define Canada. It's a never-before-seen view of Canada - rising up and bearing witness to our nation's natural diversity and beauty. The meeting place of the ocean and land is the birthplace of this country's history, and the frontline of climate change. Our borders separate us from our neighbours, but also reveal how closely intertwined our histories and futures are. From the air, we have the rare opportunity to explore the world's top wildlife and nature reserves from viewpoints never imagined. On the ground, we explore the cultural and historical secrets locked in the contours of this coastline.

Season 1: Atlantic Canada

Residential

An Overview of Residential Schools in Canada (Elementary Version)

An Overview of Residential Schools in Canada (Elementary Version)

Grades 5-8 2015 CC 15 min McIntyre Media Inc.

First Nations people have lived in this country for many thousands of years. They were here long before anyone else. In the 16th century, European explorers and missionaries began making their way to Canada. Life would begin to change drastically for many aboriginal people. Disease, loss of culture, loss of land, and unkept promises. As the Canadian government looked for a way to expand westward, a series of treaties set in motion a system of residential schools. Education was a way to “assimilate” the children – to make them behave and think more like the Europeans who were taking over Canada.

Residential schools had a lasting impact on First Nations individuals, families and communities. The children who returned home brought with them the various abuses they experienced. That has affected their families and communities for generations. Children came home lonely, depressed and scared. Many had died without ever seeing their parents again.

This program gives students an overview of the residential school system in Canada. Combining archival footage with residential school survivor interviews, students will learn why and how the schools were established, the effect of treaties on aboriginal life, the impact of residential schools on future generations, what life was like for children in these schools, and an appreciation of aboriginal culture and history.

Correlates to the following subject areas:

History, Geography, Social Studies, FNMI Studies, Treaty Education classes.

ial Schools

Residential Schools: Truth and Reconciliation in Canada (Secondary Version)

Grades 9-Post-Sec 2015 CC 18 min McIntyre Media Inc.

Indian Residential Schools are a part of our shared history in Canada. Prior to European contact, First Nations people had their own education system, governing system, beliefs and customs. While some positive alliances were established, the arrival of missionaries and others kicked off a systematic attack on the traditional customs and culture of native communities. In 1883, as a result of treaty negotiations and government proclamations, Prime Minister Sir John A. Macdonald authorized the creation of three “industrial schools.” Thus began the misguided attempt “to kill the Indian in the child.”

Between 1879 and 1986, at least 150,000 aboriginal children in Canada - almost a third of aboriginal children - were forcibly removed and placed into Indian Residential Schools. The assault on Aboriginal identity began the moment children took their first step across the school’s threshold. Their unique

culture was stripped away to be replaced with a foreign European identity. Their family ties were cut, clothes replaced, and children were prevented from returning home.

The telling of Canada’s history is not complete without this story. Some refer to it as a “cultural genocide.” Generations upon generations of aboriginal people have been affected by the abuse and horrors experienced in these schools. The Truth and Reconciliation Summary that was undertaken as an element of the Indian Residential Schools Settlement Agreement outlines 94 recommendations for achieving a full reconciliation between Canada’s native and non-native peoples.

Correlates to the following subject areas:

History, Geography, Social Sciences, FNMI Studies, Treaty Education, Civics, English and Law classes.

Streaming Rights: 3 years - Single Site (K-12) - MCI083-ST - \$179

Note: For Educator’s Package, Teacher’s Resource Guide will be sent as a PDF.

An Introduction to First Nations Culture & Traditions

Grades 3-8 2015 CC 27 min McIntyre Media Inc.

Before early European settlers arrived in what is Canada today, there were already many Aboriginal peoples living here. They lived right across this country and developed a rich and storied existence relying on the land and nature for food, shelter and clothing. Canada's First Peoples developed complex cultures and lived in harmony with their environment. Each cultural group was made up of several nations with similarities in language and social structure. Each group also had their own stories, ceremonies and interpretations of the world around them.

In *An Introduction to First Nations: Culture & Traditions*, students are provided with a broad overview of First Nations life and culture. Your host, Cedar Smoke introduces students to some important aspects of First Nations life – regalia and dance, food, drumming, powwows, and the importance of the environment. Elders share their wisdom regarding cultural practices, laws and traditional values. A must have for elementary social studies and art classes.

#MCI084 \$119: DVD + PDF teacher's resource guide and student activity sheets.

Streaming Rights (3 year) - Single Site (K-12) \$119

The Liberation of Auschwitz

 McIntyre Media

The Liberation of Auschwitz

Grades 9-Adult 2015 CC 11 min McIntyre Media Inc.

On January 27, 1945, Auschwitz was liberated by Soviet soldiers. Auschwitz was a network of concentration camps built and operated in occupied Poland by Nazi Germany during the Second World War. Auschwitz I and nearby Auschwitz II-Birkenau were the extermination camps where an estimated 1.1 million people—mostly Jews from across Europe, but also political opponents, prisoners of war, homosexuals, and Roma—were killed in gas chambers or by systematic starvation, forced labor, disease, or medical experiments.

Combining historic footage and interviews with Auschwitz survivors, this Canadian production examines the events that led to the creation of extermination camps across Europe. Survivors speak of the horrors they endured and the need for the modern-day world to prevent similar events from re-occurring.

This program contains graphic footage which may not be suitable for all viewers.

Malala: The Power of One Voice

Grades 6-12 2015 CC 15 min McIntyre Media Inc.

An assassination attempt was not enough to curtail the human-rights work of teenage activist Malala Yousafzai. "One child, one teacher, one book and one pen can change the world," she told the United Nations in a stirring speech.

Around the world an estimated 66 million girls are being denied the right to an education. Girls make up more than 54% of the non-schooled population in the world. Recent global estimates indicate that more than 100 million girls are involved in child labour. Fix that, scholars have long said, and you could change the course of human history. Educated girls are safer from sexual assault and childhood marriage. They go on to raise more educated children themselves.

This is what Malala is trying to change. Education is a basic human right. This wonderfully inspiring Canadian production can be used for discussions on human rights, gender/women's rights, activism and politics, comparison of education in the Middle East and Canada, the importance of education and examining the barriers that keep girls out of school.

#MCI076 \$129.95: DVD

Streaming Rights (3 year) - Single Site (K-12) \$119

The Diary of Anne Frank: A Tale of Two Sisters

Grades 6-Post-Sec 2015 CC 46 min Films Media Group

This film tells the stories of Anne Frank and Eva Schloss, whose young lives paralleled each other and whose surviving parents, Otto Frank and Elfriede Geiringer, eventually married. It features extensive interviews with Eva Schloss to help tell the story of her and Anne's brief friendship, their lives in hiding, and Otto's thinking after Auschwitz's liberation and learning of Anne's diary. The film examines who Anne Frank was as a person, Otto's decision to publish the diary, and the way his efforts promoted Anne Frank's ideals and her important legacy. Eva would be one of the first people to hear Otto read extracts from Anne's diary, a feat which he couldn't manage to do without crying. Eva witnessed the publication and dramatization of the Diary of Anne Frank and became involved in the Anne Frank Foundation set up by Otto in 1963. In 1989 she created the Anne Frank Trust UK which aimed to share the message of the Anne Frank foundation to challenge prejudice and hatred.

Design by Decade Series

Grades 9-Post-Sec 2011 CC 6 x 30 min each Blue Ant Media

From the post-war Modern style to the diversity of the new millennium – explore six decades of Canadian design. Featuring the collection of the Design Exchange- Canada's National Design Museum, Design by Decade reveals the exceptional stories behind the objects of everyday life. These are the symbols of our cultural past and present. Excellent resource for Canadian History, Family Studies and Home Economics, Art, and Industrial Design courses.

SPECIAL SERIES PRICE: ONLY \$750 (6 discs) Series Product #BAM076-NR16

Individual programs: \$139 each

Streaming Price (3 year term): Single School - K-12: \$139 per individual title

Episode 1: Post-War Design

Design by Decade explores the period from the Second World War until the end of the 1950s in Canada, examining some of the most interesting modern design objects that represent this flourishing era. *Includes: Fred Moffatt: Post War Industrial Design, the Modernist Movement: The Canadian Wooden Aircraft Company, and Jacques Guillon - The Cord Chair.*

#BAM077 \$139 DVD

Episode 2: 1960s

Design by Decade looks back to the 1960s to examine some of the most intriguing and original Canadian designs that represent this magical and intriguing era in Canadian politics and lifestyle. *Includes: Mid Century Modernism - The Project G Stereo; Expo 67 - Habitat 67 Housing Complex; The Contempra Telephone - An Icon of Contemporary Canadian Design.*

#BAM078 \$139 DVD

Episode 3: 1970s

In the 1970's, North America was drowning in economic malaise. Against this backdrop, however, creativity continued to flourish in Canada. *Design by Decade* examines some of the most fascinating and distinctive Canadian designs that represent this diverse era. *Includes: The K700 Stool - Stylistic Experimentation; The Systems Furniture Trend; Industrial Design - The Iconic Steamer Collection.*

#BAM079 \$139 DVD

Episode 4: 1980s

Throughout the decade - many design companies prospered in Canada, as awareness of prestigious design was on the rise. Despite various economic changes during this period, design from the 1980s was dynamic, original and often audacious. *Design by Decade* revisits some of the most vital and expressive designs of this era. *Includes: Attache Case - A Decade's Preoccupation with Power; Post-Modernism - The Nexus Chair; Design-Driven Studios.*

#BAM080 \$139 DVD

Episode 5: 1990s

In the early 90s, Canada found itself in a recession that affected much of the Western world. But, as the decade progressed, North America experienced economic expansion. The introduction of the NAFTA meant that Canadian industry had to learn to compete. And in the world furniture this meant a stronger focus on design itself. *Design by Decade* revisits the 1990s to examine some of the most distinctive and cutting edge Canadian designs that represent this revolutionary era. *Includes: Douglas Ball - Workspace Design; Karim Rashid - A Global Approach to Design; Sophisticated Canadian Design.*

#BAM081 \$139 DVD

Episode 6: 2000s

Design by Decade takes a look at the Canadian design landscape from the turn of the new Century until today, examining the wide array of design practices that make Canada unique. *Includes: Teknion - Large Scale Production; Contemporary Canadian Design; Sustainable Design.*

#BAM082 \$139 DVD

Coming Soon: The Syrian Refugee Crisis has made headlines around the world. To escape from the violence of the Syrian Civil War, millions of refugees have fled the country. Watch for our upcoming production on refugees: who they are, why they flee their countries, and how the world reacts.

The Italian Americans

Grades 9-Post-Sec 2014 CC 240 min/2 discs PBS

The Italian Americans reveals the unique and distinctive qualities of one immigrant group's experience, and how these qualities, over time, have shaped and challenged America. At the turn of the 20th century, many Italians immigrants came to work, earn money to support their families, and eventually return home. Nearly half of the first generation Italian immigrants did return to Italy, but for those that made America home, their

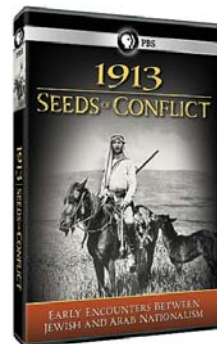

struggle to maintain a distinct Italian culture was guided by remarkably powerful ideals of family that had always been at the center of their lives.

Beginning at the US border, we explore the wonders of the continental divide, from Akamina-Kishinena Provincial Park on the BC/Alberta border, to the soaring summits of Banff National Park.

#BAM170 \$89.00 DVD

Foothills to the Badlands

From the city of Calgary - south to the border region, - and finally, to the town of Drumheller, we explore the unique landscape and archaeology of Alberta's foothills and badlands.

#BAM171 \$89.00 DVD

Saskatchewan Prairie

We explore the frontier region of Saskatchewan – from the vast plateaus of Cypress Hills Provincial Park, to the incredible, undefended open prairie lining the 49th parallel.

#BAM172 \$89.00 DVD

Manitoba Lakes

Along the Manitoba US border, we reveal incredible landscapes – from open prairie, to the harsh Canadian Shield – and, we explore stories of human migration along this wide-open frontier.

#BAM173 \$89.00 DVD

Superior Country

We begin an aerial journey east, along the shores of Lake Superior – exploring the city of Thunder Bay, and the vast, natural wonders of the world's largest freshwater lake.

#BAM174 \$89.00 DVD

Huron Boundary

From high above the city of Sault Ste. Marie, we explore the rugged Lake Huron coastline – including Manitoulin Island, Bruce Peninsula National Park, and the scenic lakeside communities beyond.

#BAM175 \$89.00 DVD

Ontario South

We explore the rich history and landscape of the Lake Erie region from Windsor/Detroit to the town of Port Dover and beyond.

#BAM176 \$89.00 DVD

Lake Ontario

From high above the roar of Niagara Falls, we begin an aerial journey east, above the waters of Lake Ontario – the cities of Toronto and Kingston, and the wonders of Thousand Islands National park.

#BAM177 \$89.00 DVD

International Seaway

From the Great Lakes, to the historic city of Quebec - we head east on an aerial exploration of the St. Lawrence Seaway.

#BAM178 \$89.00 DVD

Lower Canada

From the cities of Ottawa and Montreal we head south, exploring a maze of international boundary that divides the province of Quebec from the United States.

#BAM179 \$89.00 DVD

Atlantic Frontier

From the remote border town of Pohegemanook, we trace the Quebec, Maine and New Brunswick borders - a unique, cultural journey – ending at the open waters of the Atlantic.

Canada Over the Edge, Season 4 - Explore Canada's North

Grades 6-Post-Sec 2015 13 episodes x 52 min ea Blue Ant Media

Special Series Price: ONLY \$1027 - a saving of \$130 (Series Product #BAM181)

Individual titles: \$89

Streaming Price (3 year term): Single School - K-12: \$89 per individual title

In Season 4, explore one of the most remote - and rarely seen tracts of land on the planet - the vast, unexplored reaches of Northern Canada. The boreal forest, barren landscape, and ice-covered peaks cover nearly 4 million square kilometers, and represent 40% of the country. From the air, we have the rare opportunity to explore the abundance of awe-inspiring vistas this region has to offer. On the ground, we reveal the unique cultural, and historical aspects of this region – from residents

Baffin Island North

From high above Baffin Island, we see incredible Arctic wonders – from Eclipse Sound to Sirmilik National Park. People have lived in Pond Inlet for thousands of years and today they work to preserve this history.

#BAM182 \$89.00 DVD

High Arctic

From the hamlet of Arctic Bay we round the northernmost point of Baffin Island and the desert community of Gjoa Haven where descendants of ancient Thule people live.

#BAM183 \$89.00 DVD

Northwest Passage

We explore the Nunavut community of Gjoa Haven, where Inuit people helped explorers survive. In Cambridge Bay the Kitikmeot Heritage Society strives to integrate traditional knowledge and language into the society.

#BAM184 \$89.00 DVD

Coronation Gulf

West of Cambridge Bay, we explore Nunavut's remote, northern waterways – from Dease Strait to Coronation Gulf, and the community of Kugluktuk, home for aboriginal people for thousands of years.

#BAM185 \$89.00 DVD

Western Nunavut

The Western Nunavut region is one of the most seldom-seen landscapes on Earth. We explore Tukut Nogait National Park home to Thule and Copper peoples for many generations.

#BAM186 \$89.00 DVD

Northwest Territories Arctic Coast

The Northern mainland coast of the Northwest Territories is a stunning contrast in landscapes. The mayor of Paulatuk describes the importance of hunting and fishing for survival here.

#BAM187 \$89.00 DVD

MacKenzie Delta

From the small community of Tuktoyaktuk, we explore the MacKenzie River Delta, home to Inuvialuit people for thousands of years. Pingos, mounds of earth covered ice, were used for navigation as vantage points for hunting.

#BAM188 \$89.00 DVD

Beaufort Sea

Traditional territory for Inuvialuit and Gwich'in people, the waters of the Beaufort Sea are an Arctic gem, and whaling has been important to aboriginal life.

#BAM189 \$89.00 DVD

Dempster Highway North

The Gwich'in, "people of the flat lands", one of the northernmost aboriginal people in North America, relied on reindeer for survival. The Midway Lake Festival is one of their attempts to maintain the culture of Gwich'in people.

#BAM190 \$89.00 DVD

Dempster Highway South

From the Arctic Circle we follow the Dempster Highway south over remote geological wonders to Dawson City, ancestral home of Tr'ondëk Hwëch'in of the Hän people who came here for centuries for seasonal salmon fishing.

#BAM191 \$89.00 DVD

Klondike Trail

From historic Dawson City, we head southeast, tracing a route that has become known as the Klondike Trail. Before the gold rush, the Chilkoot Trail was used by First Nations traders.

#BAM192 \$89.00 DVD

Yukon Southern Frontier

On the Southern edge of the Yukon, we head into British Columbia - Alaska – and back again - exploring Carcross desert, Tatshenshini-Alsek Provincial Park - and the eastern edge of Kluane National Park.

#BAM193 \$89.00 DVD

Yukon Western Frontier

The Tutchone people traditionally lived in the land between Whitehorse and Kluane Lake. Now, Kluane National Park is working to reconnect First Nations people to this land which was taken from them by treaty agreements.

#BAM194 \$89.00 DVD

A Park for All Seasons Series

Grades 6-Post-Sec 2014 CC 12 episodes x 25 min each Blue Ant Media

Individual titles: \$89

Streaming Price (3 year term): Single School - K-12: \$89 per individual title

Go behind the scenes of Canada's most spectacular National Parks, and learn the history, explore the diversity and soak in the beauty of some of the planet's most compelling natural playgrounds. Follow us to the most remote corners of the parks and uncover both the iconic and obscure and see how park authorities sustain several million acres of wilderness for adventure seekers. Immerse yourself in the beauty of our country's most breathtaking parks.

Auyuittuq National Park

'Auyuittuq' means 'The Land That Never Melts' in Inuituk, the language of the Inuit. However, research reports rising temperatures and this once frozen landscape is changing.

#BAM155 \$89.00 DVD

Gwaii Haanas National Park

Known as the 'Canadian Galapagos' Gwaii Haanas National Park Reserve shelters some of the most lush and remote landscapes in the continent.

#BAM156 \$89.00 DVD

Waterton Lakes National Park

The untamed nature of the park's predators has caused deadly confrontations on cattle ranches neighbouring Waterton's borders. Now the park must work with its neighbors to ensure protection on both sides of the fence.

#BAM157 \$89.00 DVD

Wapusk National Park

One of the world's largest polar bear denning sites, Wapusk means "white bear" in the native Cree language. The park is a unique ecological zone bordering the arctic, hosting both tundra and coastal marine environments.

#BAM158 \$89.00 DVD

Nahanni National Park

Now the third largest park in Canada, the management of this immense and wild environment faces a whole new set of challenges.

#BAM159 \$89.00 DVD

St. Lawrence Islands National Park

Balance between maintaining natural areas and migration routes with encroaching human development is a delicate challenge facing this fragmented environment.

#BAM160 \$89.00 DVD

Yoho National Park

On the western slopes of the Rocky Mountains is Yoho National Park. The park's 28 mountain peaks are carved by picturesque waterfalls and more than 250 miles of hiking trails. Some of the world's most significant fossils rest in Yoho's steep rocks.

#BAM161 \$89.00 DVD

Tuktut Nogait National Park

This hidden wonder of the arctic is one of the great secrets of the Parks system. Tuktut Nogait ("young caribou") offers a traditional land where caribou, bears and wolves roam among spectacular canyon vistas.

#BAM162 \$89.00 DVD

Kejimikujik National Park

The only inland park in the Canadian Maritimes, the history of Kejimikujik history is visible within the petroglyphs carved into the landscape, representing a time when the park's lakes and rivers were prime canoe routes for tribal communities of Mi'kmaq.

#BAM163 \$89.00 DVD

Wood Buffalo National Park

Populated by one of the biggest free-roaming bison herds on the planet, and home to one of the last nesting areas in the world for endangered whooping cranes, this vast boreal wilderness expands over unique salt plains.

#BAM164 \$89.00 DVD

Pukaskwa National Park

Pukaskwa National Park features unpredictable boreal forests and iron rich plutonic rocks, and on cobbled beaches overlooking Lake Superior, one can spot rare arctic plants due to the cooling effect of the lake.

#BAM165 \$89.00 DVD

Mingan Archipelago National Park

This park's ecosystem protects a world of diversity from huge monoliths created during the last Ice Age, to Minke whales and the rare Mingan thistle.

#BAM166 \$89.00 DVD

STAND: An Environmental Documentary

Grades 9-Post Sec 2013 CC 60 min Breakthrough Entertainment

Best Film- Vancouver Festival of Ocean Films 2013

Stand takes viewers on a journey through the waters of British Columbia's stunning west coast. Under threat by a proposed Gateway pipeline and tanker route is a coastline of immense beauty, pristine ecosystems and a way of life rich in culture and history. Through the efforts of expedition stand-up paddler Norm Hann, a high school class building their own paddleboards as a form of protest, and iconic west coast surfer Raph Bruhilwer, the people, landscape and wildlife that would be affected by an oil spill are spotlighted and the consequences are dire.

Paradise Island

Grades 6-Post-Sec 2014 CC 20 min CTV

A rare journey to Canada's newest National Park

Sable Island, a secluded sandbar 300 kilometres southeast of Nova Scotia, is an almost magical place few Canadians will ever see in person. A fragile strip of sand populated by seals and wild horses grazing on windswept beaches. Todd Battis explains the constant threats to Sable Island's delicate ecosystem, and the strong legislation in place to protect it. The island is under constant threat: ravaged by the thrashing Atlantic Ocean on its northern side, the entire island is suffering the effects of climate change.

The Little Scientist Series

Grades JK - 2 2013 CC 4-10 mins each

Film Ideas

SPECIAL SERIES PRICE: ONLY \$1399 (12 programs)

Series Product #FI0000-NR16

Individual titles: \$119

Streaming Price (3 year term): Single School - K-12:

\$119 per individual title

Little Scientist helps children develop scientific reasoning by exploring the world of science that surrounds them. The unique structure of each program combines a short story with scientific information, enabling children to easily and naturally become interested and engaged. While focusing on the story, children will naturally absorb the science that is presented in various "fun" formats. Science is fun!

Titles include:

1. Our Magic Clothes: The Skin

#FI0001 \$119 DVD

2. The Secret of Colors: All About Colors

#FI0002 \$119 DVD

3. Where Is The Air?: Air & Wind

#FI0003 \$119 DVD

4. To Catch The Red Fox: The Food Chain

#FI0004 \$119 DVD

5. Here I Am!: Camouflage

#FI0005 \$119 DVD

6. Please Visit My Secret Garden: Leaves

#FI0006 \$119 DVD

7. Who Ate The Fly?: Carnivorous Plants

#FI0007 \$119 DVD

8. The Magic Time Machine: Fossils

#FI0008 \$119 DVD

9. Will It Rain or Will It Snow?: Weather

#FI0009 \$119 DVD

#FI0010 \$119 DVD

11. Shhh! It's Earth's Secret: Gravity

#FI0011 \$119 DVD

12. I Can See It!: Convex & Concave Lenses

#FI0012 \$119 DVD

Science Max: Experiments at Large

Grades 2-8 2015 CC 13 x 22 min each Breakthrough Entertainment

Have you ever conducted a science experiment and wondered “What would this be like if it were HUGE?” With fun little science facts, humorously re-enacted moments of science history and wacky takes on the most mundane subjects, SCIENCE MAX will conduct experiments on a supersized level that our viewers can’t do at home. Host Phil McCordic starts by demonstrating experiments on a small scale then SUPER-SIZES them.

SPECIAL SERIES PRICE: ONLY \$1548 - a saving of \$129 (Series Product # BTE079)

Individual programs: \$129 each

Streaming Price (3 year term): Single School - K-12: \$129 per individual title

Rocket Car

Phil builds a balloon powered car in the lab. Then he tries to make one big enough to ride. Can the Science Max build team find a big enough balloon? Or are balloons the way to go? Plus, Newton’s Cradle out of bowling balls, how Guinea Pigs got their name and Newton’s 3rd Law.

#BTE080 \$129: DVD

Elastic Energy

Phil builds a catapult that hurls pumpkins out of pencils and elastics. Includes a historical re-enactment (sort of) of how catapults were used in medieval days.

#BTE081 \$129: DVD

Friction

Phil examines friction by building a balloon-powered hover disc. Phil also tries to use the power of friction to climb the walls and even to fly!

#BTE082 \$129: DVD

Pasta Bridge

Ever wanted to build a bridge out of pasta? What about one strong and big enough for Phil to walk across? Plus, learn how to build a sandcastle you can stand on!

#BTE083 \$129: DVD

Magnetic Levitation

Magnets have poles – when you put opposite ones together, they attract. But when you put the same ones together, they repel. Could we find magnets powerful enough to repel each other and float Phil off the ground?

#BTE084 \$129: DVD

Tinfoil Boat (Flotation)

What makes boats float? Tinfoil doesn’t float, but a boat made of tinfoil does. It’s all about how you build it. Watch as Phil builds his human-sized tinfoil boat wrong several times before he figures it out.

#BTE085 \$129: DVD

Chemistry

The old ‘vinegar and baking soda volcano’ needs an overhaul. What happens if we use 60 times as much? What about using 100% acid? What about even more reactive chemicals?

#BTE086 \$129: DVD

Air Pressure

Learn how to use air pressure to make your own, home-made rocket out of a plastic water bottle.

#BTE087 \$129: DVD

Simple Machines

What good is Science if you can’t use it to give you super strength? Phil does just that using the power of simple machines to move, lift and roll a machine he could barely budge otherwise.

#BTE088 \$129: DVD

States of Matter

Solid, Liquid, Gas and all the things in-between. What’s in between? Cornstarch mud. Sometimes it’s a liquid, but sometimes a solid. Phil fills a giant trough with it to see if it’s solid enough to run across.

#BTE089 \$129: DVD

Paper Airplane (Flight)

Start by learning how to fold the paper airplane that won the long distance record. Then Phil tries to make a giant paper airplane to see if it will still fly. Turns out, it’s way harder than you’d think.

#BTE090 \$129: DVD

All About Balance

How can you balance a potato on a stick? And, more important, can Phil balance on a tightrope using the same science? What’s better for balance, staying put or using something that spins? Phil walks the tightrope then designs a gyroscopic stabilization backpack.

#BTE091 \$129: DVD

Drag Racer (Inertia)

Phil builds a small drag racer in the lab that uses the inertia of its wheels to move. Then he tries to max it out. The final experiment involves a jacked up car and a large frame with Phil riding it. Includes Newton’s laws, pulling a tablecloth without breaking the dishes and a caveman trying to break down a door.

#BTE092 \$129: DVD

Sports Lab Series

Grades 2-8 2015 CC 13 x 11 min each Breakthrough Entertainment
The dynamics of science behind the sports we play! A celebration of sports and getting active! SPORTS LAB is a series for kids aged 6-11 that showcases a wide range of sports. It helps kids better understand them while demonstrating the scientific elements at work. SPORTS LAB also promotes participation and active play, important messages for kids surrounded by digital distractions. Inclusiveness and accessibility are also key factors.

SPECIAL SERIES PRICE: ONLY \$1548 - a saving of \$129 (Series Product #BTE093)

Individual programs: \$129 each

Streaming Price (3 year term): Single School - K-12: \$129 per individual title

Soccer (Kinetic Energy)

Legendary pro Dwayne De Rosario demonstrates his kicking style for soccer nut Sophie. Dr. Heather explains the kinetic energy that makes Dwayne's kick so powerful.

#BTE094 \$129: DVD

Track & Field (Centre of Gravity)

Anjelina is a young sprinter looking to move faster out of the start. She gets some great tips from guest pro Ashlea, while Dr. Heather weighs in on the centre of gravity that helps them tear up the track.

#BTE095 \$129: DVD

Baseball (Kinetic Chains)

Dr. Heather discovers that a kinetic chain gives guest pro Bryce the power to knock it out of the park, inspiring younger brother Porter to step up to the plate against host Nykeem's pitching.

#BTE096 \$129: DVD

Skateboarding (Thrust and Drag)

David is a young skater looking to kick his tricks up a notch. Together with host Nykeem and guest pro Erik, David spends a dynamic day in the park learning about power of thrust and drag.

#BTE097 \$129: DVD

Cricket (Airflow Dynamics)

Cricket star Darius D'Souza mentors Abraham and Delaine, two friends who share a keen passion for the game. Dr. Heather breaks down Darius' wicked swing bowl, and the kids bring their new knowledge of airflow to the pitch.

#BTE098 \$129: DVD

Tennis (The Magnus Effect - effect of spin)

Host Nykeem doubles up with Chloe, a passionate young tennis player working to perfect her top spin game. With tips from guest pro Daniel and some scientific insight from Dr. Heather in the Sports Lab, there is no stopping Chloe on her way to stadium court.

#BTE099 \$129: DVD

Dressage (Biomechanics)

Nykeem meets up with Tai-Lee and her horse pal Gerald to explore the science behind dressage. Biomechanics is key.

#BTE100 \$129: DVD

Table Tennis (Muscle Memory)

Brother and sister duo Antong and Anda are hoping to sharpen their table tennis game with some help from guest pro Jimmy. Nykeem and the kids get a chance to flex their skills when Dr. Heather unpacks the science of muscle memory.

#BTE101 \$129: DVD

Trampoline (Hooke's Law - elasticity)

Young gymnast Nya jumps at the opportunity to learn more about the science of trampoline. Learning about Hooke's Law has her ready to spring into action.

#BTE102 \$129: DVD

Breakdancing (Centripetal Force - motion in a curved path)

Logan discovers that centripetal force has a lot to do with some of his wild moves.

#BTE103 \$129: DVD

Curling (Friction)

Emily wants to improve her curling game. She learns that friction can be a friend out on the ice.

#BTE082 \$129: DVD

Volleyball (Newton's Laws of Motion - inertia, acceleration, action/reaction)

Guest pro Kira joins host Nykeem and up-and-coming powerhouse Megan to dig into the science of the float serve. Dr. Heather sheds some light on Isaac Newton's Laws of Motion and the team serves it up on the court.

#BTE105 \$129: DVD

Hockey (Elastic Collisions)

Host Nykeem assists young Chase in an action-packed day on the ice. The gang learns about the science of the slap shot when Dr. Heather briefs them on elastic collisions.

#BTE106 \$129: DVD

History of Life Series: A Study of Evolution Series

Grades 9-Post-Sec 2013 CC 45-50 min each Film Ideas

Explore the history of life from its humble beginnings as single-celled organisms, to its great blossoming and proliferation, which took place over the course of eons. With the help of state of the art computer graphics and excellent cinematography, the world's foremost paleontologists and biologists help unravel the greatest mysteries of life.

SERIES PRICE: \$975 (Series Product #FI0013)

Individual titles: \$195

Streaming Price (3 year term): Single School - K-12: \$195 per individual title

Plants: Earth's Quiet Rulers

Plants, the oldest form of life on earth hold many mysteries. While plants are often thought of as passive, we will see how many species have adopted aggressive strategies that have allowed for their survival. It is these "quiet rulers" of earth that are not only the foundation of the global ecology, but also the spring from which all life flows.

#FI0014 \$195: DVD

The Story of the Feather

Feathers play an important role in evolution. Originally providing insulation they eventually led to flight. In The Story of the Feather we chronicle how the fossil discovery of the Chinese reptilian wing, a four-winged dinosaur with primitive wings, has provided evidence that dinosaurs gradually evolved winged feathers, ultimately becoming the birds that we are familiar with today.

#FI0015 \$195: DVD

The Landing

Life, which first inhabited the seas and then land, is an amazing story. Through investigation of ancient trailblazers such as Tiktaalik, we learn the gradual process by which lungs and legs evolved, and how the creatures of the seas eventually conquered the land. Reverse evolution, from land to sea, is also presented.

#FI0016 \$195: DVD

Mating – The Search for the Other Half

One of the most profound mysteries in the world, love between males and females, is explored. What was the evolutionary impetus which gave rise to love? Through an experiment involving the chlamydomonas, we recreate the fateful moment 25 billion years ago when genders first appeared.

#FI0017 \$195: DVD

Extinction – An End and a New Beginning

Mass extinctions have shaped and reshaped the landscape of life on earth throughout its history. In this program we chronicle the history of mass extinctions and their effect on evolution. We learn that these events not only destroy life, but also create the fertile ground from which life can take root again.

#FI0018 \$195: DVD

The Ebola Plague: W5

Grades 10-Post-Sec 2014 CC 20 min CTV

W5 Correspondent Tom Kennedy tracks the rapidly spreading and deadly Ebola virus in West Africa, which has now infected thousands in Guinea, Sierra Leone, Liberia, and Nigeria, with an estimated 50% death rate. With governments and health agencies desperately seeking to stop the epidemic, W5 looks at the work being done by Canadians to fight the disease and investigates what would happen if the Ebola outbreak spreads to Canada.

#CTV638 \$129.95: DVD

Streaming Price (3 year term): Single School - K-12: \$129.95

Outbreak: Frontline

Grades 10-Post-Sec 2015 CC 60 min PBS

Award-winning journalist Dan Edge (The Wounded Platoon) and his team spent four months in West Africa tracing Ebola's path, interweaving material filmed inside the Ebola zone with the timeline of the world's response to lay out the turning points of how this tragedy might have been avoided. Outbreak raises questions about whether governments and global health organizations have the capacity to respond at the right scale the next time the world faces a major infectious epidemic.

Cell Biology: Structure, Function, and Processes Series

Grades 9-Post Sec 2014 CC 20 min each Films Media Group
They are the basic building blocks of life, but in reality there's nothing "basic" about cells - the complex, versatile units of matter that make up all life on Earth. In this four-part video series, rich animation brings the intricate inner workings of cells to life, while a congenial host guides viewers through the essentials of cell biology.

SPECIAL SERIES PRICE: ONLY \$687.80 - a saving of \$40

Series Product #394525

Individual titles: \$181.95 DVD

Streaming Price (3 year term): Single School - K-12: \$181.95 per title

Titles include:

Cell Structure and Function

This program explores the basic structure of both animal and plant cells and the specific functions that different cell components serve.
#394521 \$181.95: DVD

Cell Metabolism and Respiration

All living organisms need energy to perform day-to-day tasks. Using straightforward, vibrant animation to anchor otherwise complex ideas, this program shows how that energy is created through the metabolic processes of catabolism, aerobic cellular respiration, and anabolism.

#394522 \$181.95: DVD

Cell Division and Growth

The cell cycle is a series of developmental and growth events that chart the normal life of a cell. This program uses easy-to-follow animation to illustrate the growth phases of the cell cycle and the processes of mitosis and cytokinesis that follow.

#394523 \$181.95: DVD

Stem Cells and Cellular Differentiation

That a tiny collection of cells can divide, multiply, and transform into the proper combination of lung cells, brain cells, bone, muscle, and more—eventually becoming a fully formed human being—is often referred to as the miracle of life. But at the cellular level, this is the story of stem cells, cellular differentiation, and gene expression. This program explores these topics.

#394524 \$181.95 DVD

Volcanic Odyssey Series

Grades 7-Post-Sec CC 30 min ea Blue Ant Media
Volcanologist Thomas Pfeiffer, together with his team of local experts, cater to the adventurous and volcano curious and take guests on exciting journeys around the world to the most eruptive volcanoes. From the notorious and deadly Krakatoa, to the remote and inhospitable heat of the Danakil Depression of Ethiopia, Volcano Discovery will follow Thomas and his crew as they take viewers into world of beauty and awe of this somewhat misunderstood spectacle.

SPECIAL SERIES PRICE: ONLY \$660

Series Product #BAM098

Individual titles: \$175 DVD

Streaming Price (3 year term): Single School - K-12: \$175 per individual title

Crossing the Danakil

German volcanologist Tom Pfeiffer takes a group of volcano climbers on an adventure across the Danakil, and then on to the summit of the Erte Ale volcano to see one of the world's few active lava lakes.

#BAM099 \$175: DVD

The Child of Fire

When Tom Pfeiffer hears that Anak appears to be going into a violent phase, he hops on a plane to Indonesia to see if the Child of Fire is ready to repeat the pattern of its ancestor.

#BAM100 \$175: DVD

The Gates of Hell

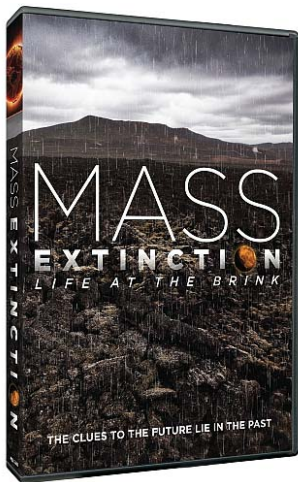

Tom Pfeiffer and a group of volcano climbers head to Mount Etna to see if they will get lucky to catch a paroxysmal eruption.

#BAM101 \$175: DVD

The Fires of Pelee

A sudden collapse of the crater floor and a massive eruption drains Hawaii's Kilauea volcano of lava, making it possible to explore.

#BAM102 \$175: DVD

Mass Extinction: Life on the Brink

Grades 9-Adult 2015 CC
60 min PBS

Mass Extinction: Life at the Brink joins scientists around the globe as they unravel the mysteries of two of the most dramatic mass extinctions -the "K/T Extinction" that wiped out the dinosaurs, and "The Great Dying," which obliterated nearly 90% of all Earth's species.

The Physics of Light

Grades 10-Post-Sec 2015 CC 300 min/2 discs PBS

This intriguing 6-part documentary series explores the concepts of physics from familiar theories, such as Newton's Law of Gravity, to the latest in scientific research, like string theory and M-theory. By connecting all of this research with the medium of light, we can gain a deeper understanding not only of our immediate reality, but of the unseen realities that are hidden beyond our perception. Starting with Einstein's Theory of Relativity, Physics of Light explores the true nature of light, peers inside the atom, and looks ahead to the most cutting edge theories in physics.

Episodes include:

- Light and Time - The Special Theory of Relativity
- Light and Space - The Theory of General Relativity
- In Pursuit of Light
- Light and Atoms
- Light and Quantum Physics
- Light and Strings

King of the Dinosaurs: W5

Grades 9-Post-Sec 2015 CC 20 min CTV

Phil Currie has devoted much of his 65 years to digging up dinosaur bones and studying them. By piecing together clues buried for millions of years, Currie has helped to uncover how birds and dinosaurs are related, and how dinosaurs lived together in groups. He's discovered dozens of dinosaur species and named 25 of his finds. There have been at least seven dinosaurs named in his honour; but he's so modest, he's not quite sure of the precise number. Currie's research has led him to dig in sites around the world, but much of his work has been carried out right here in Canada. More specifically, in Alberta's Dinosaur Provincial Park, a place that Currie told W5 is one of the richest sites in the world for dinosaur fossils.

Individual titles: \$99

Streaming Price (3 year term): Single School - K-12: \$99 per individual title

**Winner of the Summer
2015 Academics' Choice
Smart Media Award**

Math Mysteries: Crimes, Capers and Whodunits is a series of five interactive mysteries designed to integrate the math curricula with engaging mysteries for students to unravel. Because each mystery incorporates a range of appealing skills applications, it is *ideal for review, skills recovery, and enrichment purposes*.

Let your students apply their math skills to real world problems as they solve intriguing mysteries and whodunits. Super sleuths from the Pi Detective Agency have gathered data and clues from unsolved cases. Your students will need to sift through written case files, dissect video interviews with possible

suspects, test theories and more as they apply their content knowledge to a variety of engaging mathematical challenges.

The student activities and the workbook help scaffold learners towards solving the crime, grabbing the reward, catching the crook and finding the treasure!

The Treasure of Pirate's Cove (Targeted Area: Geometry)

Captain Jack has buried a treasure on Bell Harbor Island. There's a map (but what does it mean?) and other clues, including a stolen sextant, shifty stories from old-time treasure hunters, and a talking parrot. Students need to apply their geometry skills to bring this case to a close.

#600658 \$99: DVD, Teacher's Resource Guide, Student Investigation Workbook and Case File.

The Cookie Factory Mystery (Targeted Area: Ratios and Proportional Relationships)

Someone has sabotaged Charlene Strawberry's secret cookie recipe and made the cookies taste like dog food! Students need to understand ratios and proportional relationships to be able to solve this mystery.

#600659 \$99: DVD, Teacher's Resource Guide, Student Investigation Workbook and Case File.

Peterson's Last Challenge (Targeted Area: Number System)

When Gabe Peterson died, he left videotaped instructions promising gobs of money to the first person to correctly identify the name of Peterson's favorite dog. Student sleuths need to unravel tricky clues using the number system if they want a shot at his Peterson's millions.

#600660 \$99: DVD, Teacher's Resource Guide, Student Investigation Workbook and Case File.

Lord Symington's Castle (Targeted Area: Expressions and Equations)

Lord Symington hid a fortune in diamonds and gold somewhere in his huge castle. He left clues to the whereabouts of his fortune in the form of mathematical riddles. Students must apply their knowledge of expressions and equations to get straight to the heart of the matter and find the goods.

#600661 \$99: DVD, Teacher's Resource Guide, Student Investigation Workbook and Case File.

The Clown Capers (Targeted Area: Statistics and Probability)

Someone cleverly disguised as a clown has been covering the city in graffiti and making a mess. Security cameras have caught the culprit on video, but it's awfully hard to make a positive ID of someone in a clown costume. To unravel the clues and catch that clown, they need to utilize statistics and probability, plus their critical thinking skills.

#600662 \$99: DVD, Teacher's Resource Guide, Student Investigation Workbook and Case File.

Say No to Negative Peer Pressure

Grades 3-5 2015 CC 29 min Human Relations Media

This three-part series shows young students how and when to say, “No!” Viewers follow along with three narrative scenarios as the protagonist decides what to do and how he/she will resolve the problem by saying “No.” These true-to-life scenarios pertain to peer pressure, sibling trouble, and bullying. Hosts introduce each section and emphasize key information. After watching, students will be able to demonstrate various ways to say “no” in any appropriate scenario.

PART 1: When To Say No

In this introductory section, viewers learn the key phrase: If someone asks you to do something that makes you feel uncomfortable or unsafe, you can say “No.” This phrase is demonstrated through three dramatic scenarios that play out through each part of the program. First, students meet Derek who catches his sister drinking in the garage with her friend. Next, viewers meet Miguel whose friends try to coerce into doing a skateboard trick he isn’t comfortable with; and lastly viewers meet Ariella who struggles with being a bully bystander. The program ends with hosts recapping the stories and setting up what viewers will see next in Part 2.

PART 2: How To Say No

In part two, viewers learn how the protagonists will say “no” in each scenario. Viewers also recognize the reasons why it can be difficult to say no. Rejection is when you’re worried someone will stop being your friend, reasoning is when the person tries to convince you otherwise by giving excuses, bullying is when someone picks on you either physically or verbally. Hosts demonstrate how young people can say “no” firmly and assertively and by making “I” statements. Then, viewers see the characters use these tactics in the scenarios.

PART 3: After You Say No

In this final section, viewers learn what to do after you say no. In Miguel’s story, Miguel suggested another trick that he felt comfortable trying in front of his friends. Similarly, Ariella made a suggestion to include everyone in the game of 4 square. Even when her suggest was rebuffed, Ariella stuck to her instinct and walked away. Lastly, Derek followed through with saying “no” to his sister by talking with an adult about the drinking. Telling an adult is an important part of saying no, because adults can often help. Hosts recap all of the key phrases, vocabulary and sum up the program for students, who are now well-equipped to say “no” and mean it!

Highs, Lows, and In-Betweens of Puberty

Grades 4-6 2015 CC 20 min Human Relations Media

Puberty is a time of emotional change as well as physical change. With the insight of kids going through puberty, a psychologist, and a pediatrician, this program helps students understand that their changing emotions may be confusing and intense, but are absolutely normal. Viewers examine the many elements of emotional growth in puberty: what causes mood swings; the role of hormones in how you feel; the need for extra sleep; how new responsibilities can create stress at home and at school; the impact of new friendships, including romantic crushes;

the quest for independence from parents; and the desire to fit in with peers. The kids and doctors talk about how kids in puberty can learn to cope, communicate, and compromise to make a smooth transition to young adulthood.

How to End Unhealthy Relationships

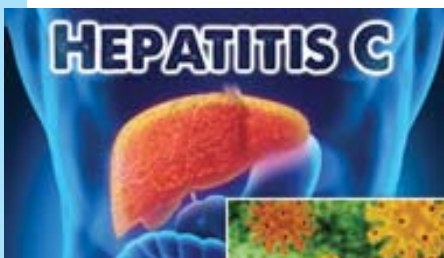

Grades 7-Post-Sec 2015 CC 20 min Human Relations Media

This program offers teens insight on how to honestly assess the health of relationships, particularly romantic relationships and intense friendships, and then presents concrete steps to help viewers end unhealthy relationships. Teens share their experiences covering a broad spectrum of unhealthy relationships from a once good friendship that has gone bad, to a romantic relationship that has become abusive. Social workers Amy Edelstein and Eri Kim offer insight on how to end a relationship safely and effectively. The experts also present a

model for students to use to help evaluate their current relationships and discuss what to do if a friend is in an unhealthy relationship.

Hepatitis C: Causes, Symptoms, Prevention, Treatment

Grades 7-Post-Sec 2015 CC 20 min Human Relations Media

Hepatitis C is one of the most common blood-borne infections in North America. Many young people are putting themselves at risk for this potentially fatal disease, primarily as a result of intravenous drug use but also because of tattoos performed by unlicensed artists, unprotected sex, and the sharing of razors and tooth brushes. Students learn that there is no vaccine that can protect them from the virus. The program describes how many people are not aware that they are infected but are at risk for serious liver disease and cancer later in life. A

former intravenous drug user describes how she was infected and how a cousin died from the disease. The program details measures to prevent being infected and urges those who have put themselves at risk get tested. A doctor emphasizes that there is now a very effective treatment for the disease.

What is Sexual Assault, What is Consent? Series (3 parts)

Grades 7-Post-Sec 2015 CC 3 x 13 min Human Relations Media

Part I: Three Survivors

Defines terminology including sexual assault, sexual violence, rape culture, and consent. Defines who is able and unable to legally give consent. Gives statistics for who is at the greatest risk for sexual assault, who is likely to be a perpetrator of sexual assault, and which groups of people underreport sexual assault. Hear stories of sexual assault as told by survivors.

Part II: Choices After an Assault

Breaks down your options as a survivor of sexual assault, including medical intervention, forensic exams, filing a police report, prosecuting a perpetrator, seeking counseling and other services, victim's rights, and rights as a minor. Also examines the best methods of supporting a friend or relative who has experienced sexual assault and how you might help them after an assault.

Part III: Prevention Techniques: Risk Reduction & Bystander Intervention

This section examines two important methods for prevention of sexual assault and explains that sexual assault can never be 100% preventable. Experts explain methods of risk reduction such as going out in numbers, staying together, and keeping tabs on friends. Guides students through a step-by-step explanation of bystander intervention techniques, in which people work together to intervene before, during or after an assault occurs.

Benefits of Exercise

Grades 7-Post-Sec 2015 CC 20 min Human Relations Media

This program focuses on the positive effects of exercise for both physical and emotional health. An expert on exercise physiology discusses the importance of different elements of fitness. Teenagers and young adults share personal stories about how exercise helped them achieve and maintain a healthy weight, build strength, develop endurance, improve agility, boost self-confidence, and help them connect socially.

John Ratey, a professor of psychiatry, describes the growing evidence that aerobic exercise remodels our brains, making us sharper mentally and providing protection against mood disorders. Teens describe how exercise helped them deal with depression, anxiety, and stress.

The program concludes with concrete suggestions from the exercise physiology expert on establishing an exercise routine that students can enjoy and stick with.

The Mind/Body Connection:

How Your Emotions Affect Your Health

Grades 7-Post-Sec 2015 CC 20 min Human Relations Media

In this program students learn how their emotional health affects their physical health and vice-versa. The program describes how many physical ailments have a mental component and are precipitated by factors such as stress, anxiety, and depression. Researchers and clinicians talk about how improvements in psychological functioning can mitigate and even prevent the symptoms of many

diseases.

Young people profiled in the program describe how mindfulness techniques such as meditation and yoga have helped them deal with emotional problems. They also talk about how physical exercise can help lift mood, sharpen thinking, and ease stress. One young woman describes how exercise helped her deal with depression. Viewers come away with the message that emotional health promotes physical health, and a healthy body leads to a healthier, happier mind.

Dead End Diets: Why Fad Diets Don't Work

Grades 7-Post-Sec 2015 CC 20 min Human Relations Media

There are dozens of quick-fix diets from eating only grapefruit, to detox cleanses, to chili pepper concoctions, to eating the way some celebrity recommends for instant weight loss. These fad diets do not work and may be harmful to a teenager's health. This program looks at the science of weight loss and dieting and contrasts it with the billions of dollars spent by the fad diet industry to hook you on one scheme or another. Katrina Schroeder, a nutritionist for adolescents, explains how teens get fooled into thinking a fad diet is good, only to find out that

it has bad health consequences. She warns teens, "don't get trapped by all the hype!" and gives tips for healthy food prep and healthy eating habits.

Toxic Vapors: Teen inhalant Abuse Prevention

Grades 5-10 2015 min CC Human Relations Media

This gripping program shares unforgettable real stories of teens fighting their abuse of inhalants, as well as two

families who lost children to inhalant abuse. One interview segment involves a police officer whose son died after a brief experiment with

inhalants. Another recounts a recovering user who learned first-hand that huffing inhalants is not only perilous, but can quickly lead to other types of drug abuse. In between the real stories, a group of teens talk directly to viewers addressing the addictive nature of inhalants and clearly outlining the damage these toxic chemicals cause to the brain, heart and lungs.

The Hookah Hoax

Grades 7-Post-Sec 2015 min CC Human Relations Media

Hookahs, also known as water pipes, are at least as popular as cigarettes among high school students. This fact-based

program refutes the widely believed myth that hookahs are a safe alternative to cigarette smoking. Using engaging graphics, the

program shows how in a routine hookah session smokers typically inhale 100 times the amount of smoke inhaled smoking a cigarette. A leading scientist describes his research that shows that smoke from a hookah contains many of the same toxins found in cigarette smoke. Viewers learn that shisha, the flavoured tobacco used in hookahs, contains nicotine and is just as addictive as other forms of tobacco use. The program also debunks the myth that herbal or tobacco-free shisha is a healthy alternative. Students learn that it contains most of the disease-causing toxins that are present in tobacco shisha.

#600655 \$189: includes DVD, teacher's resource book, student handouts with pre/post tests in digital format. Streaming Rights (3 year term): Single School – K-12: \$189

Edible Marijuana: Is It Safe?

Grades 7-Post-Sec 2015 min CC Human Relations Media

While many teens may think that eating marijuana is an okay way to get high, it is in fact dangerous, illegal and risky.

This program helps teens understand the science of why the THC in edible marijuana causes unpredictable and dangerous highs. Metabolizing

edible marijuana produces a different response than smoking it, so the risks of underestimating the potency of eaten marijuana can lead to intoxication, paranoia, high anxiety and tolerance. The program stresses that teens are more susceptible than adults to brain damage from marijuana use of any kind. There are no 100% accurate uniform standards for THC content. As edibles become more and more easily available, teens need to understand the risks and dangers, including DUI.

#600654 \$189: includes DVD, teacher's resource book, student handouts with pre/post tests in digital format. Streaming Rights (3 year term): Single School – K-12: \$189

Top Ten Reasons Not to Drink Alcohol

Grades 7-Post-Sec 2015 min CC Human Relations Media

Teen viewers will be riveted by the facts and information

on this 10-point countdown. Just let the facts speak for themselves to understand the impact of alcohol on teen lives: #10 Impaired Decision-Making;

#9 Vision Impairment; #8 Memory Loss; #7 Long-Term Brain Damage; #6 No Safe Amount for Teens; #5 Drinking to Get Wasted; #4 Legal Issues; #3 Addiction; #2 DUI; and #1 Death. The countdown is supported by the latest science and data, with an extensive student/teacher resource book.

Toxic Life Cycle of A Cigarette

Grades 7-Post-Sec 2015 17 min CC Human Relations Media

Most people know that smoking is bad for your health, but what about the lesser known effects of cigarette manufacturing, consumption and disposal? In this program, students hear from teenage farm workers who describe being exposed to harmful pesticides and nicotine poisoning. It details how around 600 chemical additives are added to tobacco and that the purpose of many of these chemicals is to make the experience of smoking more addictive. A leading scientist describes the hazards of secondhand smoke to nonsmokers and how they, too, are put at risk for cancer and heart disease. Students also learn how cigarette smoke can leave a toxic residue called third-hand smoke that coats furniture, carpets,

drapery and clothing and poses a lingering health risk long after smoking has stopped. Finally they see how cigarette butts make up a large part of the world's litter and that the poisonous chemicals remaining in this litter threaten wildlife and our own health.

Whispers of Life

Grades 7-Post Sec 2013 11 mins Turbid Lake Pictures

"This film has tremendous value as a tool of education, awareness, and prevention related to suicide among LGBTQ youth. Whispers of Life should be a resource in schools of all levels (i.e., elementary, high school, middle school or junior high, and post-secondary), community settings, and in health-related programs aimed to promote education about sexual and gender diversity." - Treena Orchard, Faculty of Health Sciences, Western University

In this magical story about the interdependence of imagination and survival, Tom, a gay teenager, is threatened by a bully's homophobic words. As Tom sits with angst on his park bench, a stranger named Charles suddenly appears next to him. Charles strikes up a conversation with Tom that forever alters the course of his future and life.

Whispers of Life is inspired by the onslaught of publicized gay, teen suicides. This short film works as an artistic intervention to challenge the societal taboo of suicide, the pervasive and damaging effects of anti-gay bullying and the fact that these issues are not discussed openly.

Growing Up Trans: Frontline

Grades 9-Post Sec 2015 CC 90 min PBS

Just a generation ago, it was adults, not kids, who changed genders. But today, many children are transitioning, too - with new medical options, and at younger and younger ages. *Growing Up Trans* takes viewers on an intimate and eye-opening journey inside this new frontier - where it's now possible for kids who feel they were born in the wrong body to never have to go through the puberty of their biological sex.

Told from the perspective of parents, doctors, and, most revealing of all, eight transgender

kids themselves, ranging in ages from 9 to 19, FRONTLINE takes a powerful look at this new generation, exploring the medical possibilities, struggles, and choices transgender kids and their families face today. With extraordinary access to the gender program at Ann & Robert H. Lurie Children's Hospital of Chicago, filmmakers Miri Navasky and Karen O'Connor examine the complicated and often controversial treatments now available to gender non-conforming and transgender kids, and explore the deeply personal emotional issues many parents and families face.

Abusive Care: W5

Grades 11-Post-Sec 2015 CC 40 min CTV

Over the course of a one year investigation, W5 uncovered at least 1,500 cases of staff-to-resident abuse and neglect in nursing homes across Canada. Behind the sad statistics are the stories that become sadder when they're investigated and the details become known. W5 takes a look at the epidemic of abuse at homes meant to care for the elderly and how front-line workers walk away without repercussions. Ill treatment often goes underreported and abusive workers are protected by secrecy and a lack of regulation.

Living with Alzheimer's

Grades 9-Post-Sec 2015 CC 18 min McIntyre Media Inc.

Alzheimer's is a disease of the brain. The most common form of dementia, Alzheimer's disease affects men and women of all races, religions and socio-economic backgrounds. It is an irreversible, progressive and degenerative disease that destroys brain cells. It is the most common form of dementia, accounting for 64 per cent of all dementias in Canada. In this short program comprised of startling statistics and interview footage from Canada AM, we learn how Alzheimer's impacts not only the person with the disease but also their caregivers. We meet people with Alzheimer's who discuss their struggles and lives. As well, singer Jann Arden, politician Olivia Chow and others discuss their roles as caregivers. Medical experts and social workers discuss what we know about the disease, who it impacts, music therapy, and the importance of physical fitness.

Being Mortal: Frontline

Grades 11-Post-Sec 2015 CC 60 min PBS

Death is something we will all one day face. So why is it so hard for doctors to talk with their patients about dying? How can the medical profession better help people navigate the final chapters of their lives with confidence, direction, and purpose? Renowned surgeon and New Yorker writer Atul Gawande explored those questions in his bestselling book, *Being Mortal*. Now, Gawande teams with FRONTLINE to bring his personal journey--and the stories of his patients and their families--to life and challenges us all to reexamine how we think about death and dying.

This film also explores the burgeoning art and science of palliative care and the ways in which having a conversation around the question "What are your priorities if your time is limited?" can empower patients to live their lives fully.

It's All About Me

Grades 9-Post Sec 2012 99 min Blue Ant Media
WINNER – BEST DOCUMENTARY - The Daring Independent Film Festival 2013

Generations X, Y and Z have grown increasingly self-absorbed from over four decades of nurturing and education based upon boosting self-esteem. It's All About Me reveals the consequences of a society driven by instant gratification, a "Me, Me, Me" mentality and how younger generations can succeed in the "real world."

The provocative and inquisitive assessments of this documentary will look at the different generations, including their history, cultural identity, traits and trends, and voice the fallout on how we arrived here. We will evaluate the Boomer legacy, for educators, parents, employers and the society in general. It will reveal what the future risks are, weigh the costs and benefits of radical individualism, and seek what opportunities exist for Gen ME to succeed in today's world. How do Baby Boomers reconcile their top-down management style with the collaborative instincts of the younger generations? How can they harness the energy and drive of Gen ME?

Shakespeare Uncovered Series 2

Grades 9-Post-Sec 2014 CC 360 min/2 discs PBS

Behind every Shakespeare play is a story. Shakespeare Uncovered portrays the Bard as an impresario who, four centuries ago, defined show business in his day-drawing on historical sources, stealing and adapting ideas, bringing back popular characters, writing prequels, and developing dramatic ideas from the politics of the day.

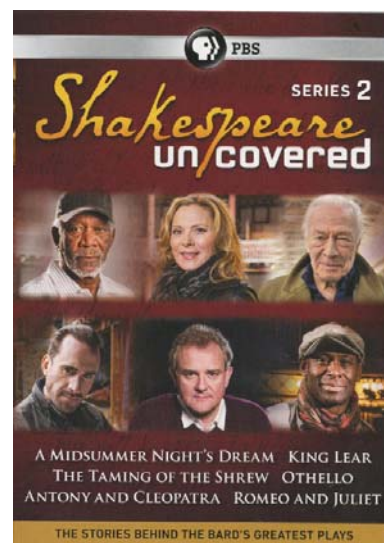

In each episode, a major Shakespearean actor or director explores and reveals the extraordinary world and works of William Shakespeare and the still-potent impact they have today. The presenters have spent their lives with Shakespeare's work and relate not only to the stories of the plays themselves, but also how they came to be written, how they have been performed, and how they have survived over 400 years.

Includes Six Films:

- Taming of the Shrew, with Morgan Freeman
- Romeo and Juliet, with Joseph Fiennes
- Othello, with David Harewood
- A Midsummer Night's Dream, with Hugh Bonneville
- Antony and Cleopatra, with Kim Cattrall
- King Lear, with Christopher Plummer

- The Histories Henry IV and Henry V – with Jeremy Irons
- The Tempest – with Trevor Nunn and Helen Mirren

Making Informed Decisions: Workplace Safety for Young Workers

Grades 9-Post-Sec 2015 CC 20 min McIntyre Media Inc.

Workplace experience is a much needed and rewarding situation for students. With the opportunities that co-op placements, apprenticeships, job shadows and internships bring, students have even more chances to succeed with a competitive edge. They are given the opportunity to learn and show their 'know-how' in the real world. As a result, the importance of preparing students to work safely, as required by the Ministry/Department of Education, is greater than ever.

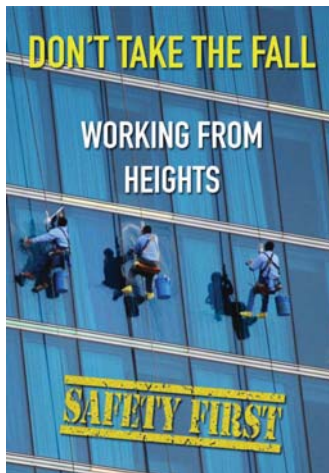

This new Canadian-produced program introduces students to the principles of workplace safety and health. It is aimed at high school and post-secondary students as a preparation for the world of work and is particularly relevant for those undertaking some form of work experience. Produced in consultation with various Canadian safety consultants, students are given important, potentially life-saving information on their rights and responsibilities in the workplace.

Each and every worker in Canada has three rights-- the right to know, the right to participate, and the right to refuse unsafe work. Every worker has responsibilities as well - the responsibility to work safely, to report hazards, and to use or wear protective devices. These rights and responsibilities, along with important safety and hazard information, are outlined in the program to help students make informed decisions, and learn to protect themselves and those around them by working smart.

Includes information on WHMIS and GHS.

Don't Take the Fall: Working From Heights

Grades 9-Post-Sec 2015 CC 11 min McIntyre Media Inc.

Falls from heights and same-level falls can happen anywhere, at any time. Whether falling from a roof, a ladder or a tree, falls result in a significant number of worker injuries and deaths. These injuries and fatalities are preventable. Taking proper safety precautions encourages a safe work environment and protects workers from any unnecessary injuries. It is important that all team members work together to follow safety procedures.

In this new Canadian-produced video made in consultation with health and safety consultants, young workers learn the essential steps to ensure a safe work environment. They learn about pre-project safety checks, how to communicate potentially hazardous areas to a supervisor or team member, and the importance of using and wearing proper safety equipment.

A special section shows a six-step guide to using a full body harness. Reinforcement of a workers' rights is also stressed. Workers have a right to refuse work that they reasonably believe is likely to endanger themselves or another worker. Employers cannot take reprisal action against workers who have worked in compliance with the law.

Getting Into Grammar

Teacher Education - For Grades K-6 2015 CC 90 min Stenhouse Publishers

Lynne Dorfman and Diane Dougherty

Do your students sigh at the mere mention of the word grammar? Do you struggle with how to make teaching grammar meaningful and lasting? In this video, you'll follow Lynne Dorfman and Diane Dougherty into second- and fifth-grade classrooms, where they weave the teaching of grammar into literacy instruction in a way that engages students and increases their understanding of essential language skills.

Unfolding over two days, the lessons focus on both nonfiction and fiction and show you how to bring grammar into the teaching of these two foundational genres. Watch as Lynne and Diane employ mentor texts to model how to use prepositional phrases and when to start new paragraphs. You'll see them conferring with student writers as well as discussing the lessons with teachers Maribeth Batcho and Dan Monaghan. Pair with Lynne and Diane's book *Grammar Matters* for a complete PD program on K-6

grammar instruction.

Up and Running with the Daily 5

Teacher Education - For Grades 3-6 2014 CC 106 min Stenhouse Publishers

"It's the first part of the year and they're up and running faster than I have ever seen."

— Joan Moser

Since its publication, teachers throughout the world have made *The Daily 5* one of the most widely read books in education. Through this proven structure, teachers experience for themselves the power of students gaining independence and monitoring their own behaviors. Join Gail and Joan as they work with third- and fifth-grade teachers in two diverse Midwest classrooms where the *Daily 5* has been in place for several years. As the popularity of the *Daily 5* has grown, more and more students have developed experience with it; teachers now have to decide how best to build upon students' familiarity with the *Daily 5* structure while addressing new content and learning objectives.

This program emphasizes the importance of starting the 10 Steps to Independence at the beginning of each year, highlights the 2 Sisters' newest thinking and learning, differentiates the *Daily 5* tasks and structure, models support strategies with at-risk students, demonstrates brain-compatible lessons, and introduces and builds the link to Math Daily 3. Whether you are new to the *Daily 5* or have been using it for many years, this program will be an invaluable accompaniment to your practice.

Math Mysteries Series: Crimes, Capers and Whodunits

for Grades 5-8

Winner of the Summer
2015 Academics' Choice
Smart Media Award

Math Mysteries: Crimes, Capers and Whodunits is a series of five interactive mysteries designed for your mathematics curriculum with engaging mysteries for students to unravel. Because each mystery incorporates a range of appealing skills applications, it is ideal for review, skills recovery, and enrichment purposes.

Let your students apply their math skills to real world problems as they solve intriguing mysteries and whodunits.

Super sleuths from the Pi Detective Agency have gathered data and clues from unsolved cases. Your students will need to sift through written case files, dissect video interviews with possible suspects, test theories and more as they apply their content knowledge to a variety of engaging mathematical challenges.

See page 24 for more information.
